DoD AWARDS GRANTS FOR STATE & LOCAL MILITARY/OVERSEAS VOTING SYSTEMS

Three new recipients of Electronic Absentee Systems for Elections (EASE) grants program announced

December 22, 2011 — Arlington, Va. – The Federal Voting Assistance Program (FVAP) is pleased to announce the next three recipients of the Electronic Absentee Systems for Elections (EASE) grants program. The funding total of \$1,321,551.96 is being distributed to these awardees to enable military and overseas voters to utilize electronic systems such as online registration, absentee ballot requests, and blank ballot delivery; however, no funding was provided for the electronic transmission of a voted ballot except in instances of mock elections. A total of 25,977 military and overseas voters will be served by the jurisdictions receiving grants. FVAP looks forward to announcing the next awardees in the coming weeks.

Harris County, TX has received a \$516,131.96 grant for military and overseas voters to apply, receive, and track their ballots online. Harris County will also develop a system to automate ballot duplication to further preserve the secrecy of the voter's ballot.

Maricopa County, AZ will receive a \$150,000.00 grant for online voter registration and absentee ballot application as well as the creation of an online voter brochure.

Orange County, FL has received a \$655,420.00 grant that will enable military and overseas voters to use online systems such as: voter registration, absentee ballot application, ballot retrieval, and ballot tracking. These systems will have multilingual support as well as help systems. Orange County will also develop a system to automate ballot duplication.

In 2008 the number one failure for military and overseas voters was in ballot transmission ([FVAP's Eighteenth Report to the Congress](#)). Local election officials receiving voted ballots reported they did not count numerous uniformed services and overseas citizen ballots because they were received after the deadline. Greater online access and automation of voter registration and absentee ballot systems could make the UOCAVA voting process easier, more intuitive, and more seamless for UOCAVA voters while maintaining the integrity of the process.

Federal Voting Assistance Program (FVAP) Director Bob Carey said, "FVAP continuously researches how to improve these UOCAVA ballot acceptance rates. One way to improve the success rates of voted ballots is to research the technology used by the voters. These grants give the States a chance to test technologies to learn what helps military and overseas voters most."

Last May, DoD announced the availability of \$16,400,000 in federal funding to support research to advance the electronic options for military and overseas citizens when voting absentee. DoD

has increased the funding level to \$20,600,000. US State, territory, and local governments were eligible to apply for the grants.

The evaluation of applications under the Broad Agency Announcement H98210-BAA-11-0001 for the FVAP Electronic EASE grants program have been completed and award recommendations have been transmitted to the Defense Human Resources Activity (DHRA) Grants Officer. Discussions with the recommended grant recipients are ongoing.
