**2010 POST-ELECTION VOTING SURVEY OF
ACTIVE DUTY MILITARY SPOUSES:
ADMINISTRATION, DATASETS, AND CODEBOOK**

**Defense Manpower Data Center
Human Resources Strategic Assessment Program
1600 Wilson Boulevard, Suite 400, Arlington, VA 22209-2593**

Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2010 Post-Election Voting Survey of Active Duty Military Spouses (2010 PEV7)*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSDP&R]). The survey program is conducted under the leadership of Timothy Elig, Director of the *Human Resources Strategic Assessment Program (HRSAP)*.

Policy officials contributing to the development of this survey include Bob Carey and Paul Drugan (Federal Voting Assistance Program).

DMDC's Program Evaluation Branch, under the guidance of Kristin Williams, Branch Chief, is responsible for the development of questionnaires used in the SOFS program. The lead survey design analysts were Rachel Lipari and Elizabeth Van Winkle. In addition, they designed the unique presentation of complex items used in the tabulation volume.

DMDC's Personnel Survey Branch, under the guidance of David McGrath, Branch Chief, is responsible for data processing, sampling and weighting methods used in the SOFS program. Laverne Wright, Chief of Survey Operations, is responsible for survey database construction and archiving. The lead operations analyst on this survey was Dee Batra, SRA International, Inc. Fawzi al Nassir, SRA International, Inc., supervised the sampling and weighting processes, and provided consultations and overall process control. The lead statistician was Owen Hung, SRA International, Inc., supported by Jeffrey Schneider and Phil Masui. Susan Reinhold and Carole Massey provided the data processing support. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Survey Technology Branch, under the guidance of Frederick Licari, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

2010 POST-ELECTION VOTING SURVEY OF ACTIVE DUTY MILITARY SPOUSES: ADMINISTRATION, DATASETS, AND CODEBOOK

Introduction

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. A Web-based survey program with postal and e-mail notification, known as the *Status of Forces Surveys* (SOFS), provides data several times per year on active duty and Reserve component members and DoD civilian employees.

The Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), 42 USC 1973ff, permits members of the Uniformed Services and Merchant Marine, and their eligible family members and all citizens residing outside the United States who are absent from the United States and its territories to vote in the general election for federal offices. These groups include:

- Members of the Uniformed Services (including Army, Navy, Air Force, Marine Corps, Coast Guard)
- U.S. citizens employed by the Federal Government residing outside the U.S., and
- All other private U.S. citizens residing outside the U.S.

The Federal Voting Assistance Program (FVAP), under the guidance of USD(P&R), is charged with implementing the UOCAVA and evaluating the effectiveness of its programs. The FVAP Office asked DMDC to design, administer, and analyze post-election surveys on Uniformed Services voter participation, overseas nonmilitary voter participation, and local election officials. Without such surveys, the DoD will not be able to assess and improve voter access. In addition, such surveys fulfill 1988 Executive Order 12642 that names the Secretary of Defense as the “Presidential designee” for administering the UOCAVA and requires surveys to evaluate the effectiveness of the program in presidential election years.

The objectives of the 2010 post-election surveys are: (1) to gauge participation in the electoral process by citizens covered by UOCAVA, (2) to assess the impact of the FVAP’s efforts to simplify and ease the process of voting absentee, (3) to evaluate other progress made to facilitate voting participation, and (4) to identify any remaining obstacles to voting by these citizens. Surveys were done of military members, federal civilian employees overseas, other U.S. citizens overseas, voting assistance personnel, and local election officials in the U.S.

The *2010 Post-Election Voting Survey of the Active Duty Military (2010 PEV7)* was designed to assess the attitudes and behaviors of the active duty military spouses throughout the

world. Active duty military are Uniformed Service members covered by UOCAVA. Data was collected by Web and paper between December 20, 2011 to March 31, 2011¹. The sample consisted of 50,132 individuals drawn from the sample frame constructed from DMDC's *Active Duty Master Edit File*. Respondents became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that their spouses were not on active duty as of the first day of the Web survey, December 20, 2010. A total of 6,491 eligible members spouses returned usable surveys, which represent an adjusted weighted response rate of 14%.

Overview of Report

This report also documents the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. Along with the survey instrument, paper and Web, and communications to the sample members (Appendices A, B and C, respectively), the methods section includes details on how the survey was conducted. DMDC (2011a) provide details on sampling and weighting for the *2010 PEV7*. Tabulated results of the survey are reported by DMDC (2011b).

Following the summary of the survey methodology is a description of the survey analysis file layout and key variables. Appendices D through J address key concepts required for the analysis of complex survey data and the structure of records in the survey analysis files are introduced in this section. The appendices in this report include:

- A and B – Web and paper survey instruments.
- C – Samples of all possible communications sent to sample members during the survey administration: letters, and emails.
- Conventions for variable naming and construction are provided in D (annotated questionnaire) and E (coding scheme),
- F, G, and H list the names and values of all variables in the basic-survey dataset and the Privacy-Act confidential variables.
 - F lists the variables in alphabetical order and flags the Privacy-Act confidential variables with an asterisk (*).
 - G lists the variables in the order that they appear in the dataset. Variables with the same function are grouped together (i.e., all variables used for weighting are located together).

¹ The survey was administered via the Web and paper-and- pencil questionnaires. Question numbers were identical between the Web and paper questionnaires except there were no open ending specify items in the paper questionnaire. Variable naming follow the order of items used on the Web administration. Appendix A provides the order of items used on the paper-and-pencil administration, and Appendix B provides the order of items used on the Web administration. The Web survey instrument allows us to have a soft opening and closing for the survey. The survey instrument was open and available to take survey responses between December 20, 2010 and March 31, 2011.

- H provides a frequency for each variable with the SAS² values, OS flat file³ values and SAS labels in the order that the variables appear in the dataset. In addition to the variables available on the basic-survey file, H contains details for the confidential variables that had to be suppressed to preserve the privacy of survey respondents and nonrespondents.
- I provides the record layout for the basic-survey flat file.
- The SAS code used to construct the analytic variables are included in J.
- K shows how current survey relates to previous surveys to the population. As the current survey is a first administered survey to active duty members spouses, K is blank.

Method

Post-Election Voting (PEV) surveys of military members, overseas federal civilian employees, overseas U.S. citizens, voting assistance officers, and local election officials in the U.S. have been conducted by FVAP in 2000, 2004, and 2008 as part of the UOCAVA mandate. However, poor sampling methodology and low survey response rates for these surveys raised concerns about FVAP's ability to generalize the views and voting experiences of survey respondents to all UOCAVA citizens.⁴ In addition, cognitive issues with the questionnaires themselves may have affected the accuracy of the data collected by each of the post-election surveys.⁵

In coordination with FVAP, the Defense Manpower Data Center (DMDC) developed methodologies for the 2010 Post-Election Voting Surveys that addressed the weaknesses of previous survey administrations.⁶ For 2010, six PEV surveys were conducted. The populations were: military members, U.S. citizens overseas, voting assistance personnel of military units and the Department of State, spouses of military members, and local election officials in the U.S. The following sections describe the methodology used in the *2010 PEV7*.

Survey Instrument

The topics covered in the *2010 PEV7* include background information, the 2010 election, absentee ballots, voting assistance information, other sources of voting information, electronic transmission of election materials, reasons for not voting in the 2010 election, the 2008 election, future voting needs, and family voting patterns. Topics covered within the ten areas of the *2010 PEV7* survey are described below:

² SAS® is a registered trademark of SAS Institute Inc., Cary, NC, USA.

³ The OS flat file is a text version of the dataset. The variables are in the columns and the records are in the rows. This data can be loaded into any statistical software package with the use of the record layout (Appendix H).

⁴ Details of sampling issues for each survey are reported by Westat (2007a).

⁵ Questionnaire design issues are described by Westat (2007b).

⁶ The planned methodology is summarized by DMDC (2008).

1. *Background Information*—Marital status, member’s active duty status, citizenship, state residency, geographic location on election day, time overseas, race/ethnicity, and age.
2. *2010 Election*—Availability of voter registration verification Web sites, voter registration status, voting interest, voting history, and voting behavior in the 2010 election.
3. *Absentee Ballots*—Absentee ballot requests; use of Federal Post Card Applications (FPCA); sources used to obtain FPCA; notification regarding submitted FPCA; receipt, completion, and return of absentee ballots; satisfaction with process of registering to vote and absentee voting process; use of the Federal Write-In Absentee Ballot (FWAB); sources used to obtain FWAB; and completion of the FWAB.
4. *Voting Assistance Information*—Use of and reasons for not using Installation/Unit Voting Assistance Officers; use of and reasons for not using the Federal Voting Assistance Program (FVAP) Web site; use of and reasons for not using the *DoD 2010-11 Voting Assistance Guide*; use of and reasons for not using the FVAP toll-free telephone service; and use of the FVAP information on Twitter, Facebook, and LinkedIn.
5. *Other Sources of Voting Information*—Use of other sources of voting information (e.g., state or local election officials, news media, spouse).
6. *Electronic Transmissions of Election Materials*—Access to fax/e-mail and use of fax or e-mail to request absentee ballots and/or cast ballots.
7. *Reasons for Not Voting in the 2010 Election*—Main reason for not voting (e.g., too busy to vote, no candidate preference, could not register to vote).
8. *2008 Election*—Voting behavior in the 2008 election.
9. *Future Voting Needs*—Best sources of information for future absentee voting; preference for receipt and return of absentee ballot for future elections; and confidence in the safety, security, and reliability of completing and sending absentee ballot via the Internet.
10. *Family Voting Patterns*—Geographic location of spouse and family members on Election Day.

Sample

The target population for the 2010 PEV7 consisted of spouses of active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard who have at least 6 months of service at the time the questionnaire is first fielded and who are below flag rank. Spouses of National Guard/Reserve members were excluded from the target population. In addition, for

respondents to have remained eligible, they must have indicated that, at the time of the survey, they were a U.S. citizen and were currently married to an active duty member.

The sample consisted of 50,132 active duty members spouses; 6,491 ultimately provided usable survey responses.

Constructing the Frame and Drawing the Sample

The target population for the 2010 PEV7 consisted of spouses of active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard who had at least six months of service at the time the questionnaire was first fielded and who were below flag rank. Spouses of National Guard/Reserve members were excluded from the target population. In addition, for respondents to have remained eligible, they must have indicated that, at the time of the survey, they were a U.S. citizen and at least 18 years old, and were currently married to an active duty member.

The sampling frame consisted of 799,606 records drawn from the June 2010 Active Duty Master Edit File (ADMF). Auxiliary information used to develop the frame was obtained from the June 2010 Family Database, the April 2010 Basic Allowance for Housing (BAH) files, and the July 2010 Contingency Tracking System (CTS) Deployment file. Additionally, to update a member's active duty status the July 2010 ADMF and the July 2010 Defense Enrollment Eligibility Reporting System (DEERS) Medical Point-in-Time Extracts (PITE) were used. Sample members who subsequently became ineligible (record ineligible) were identified by comparison to the October 2010 updates of the DEERS PITE. Other individuals were identified as ineligible by self or proxy report due to separation, retirement, incarceration, by the survey control system and during the survey fielding period, December 20, 2010, through March 31, 2011.

Stratification Variables

The frame was stratified (divided into mutually exclusive population groups) for sampling using the five population characteristics listed in Table 1.

Table 1.
Member Stratification Variables

Dimension of Stratification	Levels
Active Duty Service Branch	Army Navy Marine Corps Air Force Coast Guard
Paygrade Group	E1-E4 / Unknown Enlisted E5-E9 W1-W5 O1-O3 / Unknown Officers O4-O6
Race/Ethnic Category	Non-minority / Unknown Minority
Duty Location	U.S. & U.S. Territories, Other, Unknown Overseas
Age	18 to 24 years old 25 to 29 years old 30 to 34 years old 35 to 44 years old 45 years old or more

Researchers identified population subgroups of particular interest to policy officials. These reporting domains were defined using the demographic variables shown in Table 2. Multiple versions of most of these variables were created to permit varying levels of detail for analysis and reporting.

Table 2.
Factors Defining Key Reporting Domains (Member)

Variable	Categories
Active Duty Service	Army Navy Marine Corps Air Force Coast Guard
Paygrade Group	E1-E4 / Unknown Enlisted E5-E9 W1-W5 O1-O3 /Unknown Officers O4-O6
Gender	Male Female
Race/Ethnic Category	Non-minority / Unknown Minority
Duty Location	U.S. & U.S. Territories, Other, Unknown Overseas
Age	18 to 24 years old 25 to 29 years old 30 to 34 years old 35 to 44 years old 45 Years old or more
Conus	CONUS OCONUS

The sample size and allocation were determined using the DMDC Sample Planning Tool (Deever & Mason, 2002). The Tool uses a formal mathematical procedure (Chromy, 1987) to determine the minimum cost (i.e., minimum size) allocation that meets precision requirements (e.g., ± 5 percentage points) imposed on prevalence estimates for key reporting domains.

Within each stratum, the sample was selected with equal probability and without replacement. Sampling rates varied across the strata, so individuals were not selected with equal probability overall. Tables 3 present a summary of the sample allocation for the total population and by paygrade group, race/ethnicity, geographic region, and age group by Service.

Table 3.**Sample Allocation for the 2010 Post-Election Voting Survey of the Active Duty Military Spouses: Active Duty Members**

Sample	Total	Army	Navy	Marine Corps	Air Force	Coast Guard
<i>Total</i>	50,132	18,910	8,478	6,709	10,425	5,610
<i>Paygrade Group</i>						
E1-E4	14,390	6,509	1,992	2,116	2,886	887
E5-E9	20,259	6,890	3,998	2,446	5,004	1,921
W1-W5	4,942	3,554	413	529	0	446
O1-O3	4,781	889	978	847	1,015	1,052
O4-O6	5,760	1,068	1,097	771	1,520	1,304
<i>Race/Ethnicity</i>						
Non-minority	32,644	11,614	4,588	4,586	7,425	4,431
Minority	17,488	7,296	3,890	2,123	3,000	1,179
<i>Duty Location</i>						
U.S. & U.S. Territories, Other, Unknown	32,943	11,367	5,915	5,078	4,995	5,588
Overseas	17,189	7,543	2,563	1,631	5,430	22
<i>Age</i>						
18 to 24 years old	11,801	4,560	1,692	2,290	2,677	582
25 to 29 years old	10,915	4,137	1,865	1,481	2,317	1,115
30 to 34 years old	9,121	3,547	1,542	1,052	1,922	1,058
35 to 44 years old	12,708	4,385	2,438	1,638	2,119	2,128
45 years old or more	5,587	2,281	941	248	1,390	727

Respondents**Sample Losses**

The original sample file contained 50,132 active duty members. Losses to the drawn sample are listed in Table 4. Sample members were lost for three main reasons: (1) self- or proxy-reported ineligibility, (2) nonlocatability, and (3) refusal to participate in the survey, or other nonresponse.

A total of 2,831 sample members were determined to be ineligible. Elimination of ineligibles decreased the sample to 94.4% (N=47,301) of its original size.

Table 4.
Final Sample Relative to Drawn Sample

	Sample Size n	% of Drawn Sample	Weighted n	% of Weighted Sample
<i>Drawn sample</i>				
	50,132		799,606	
Ineligible on master files	-2,140	4.27%	-36,759	4.60%
Self-reported ineligible	-691	1.38%	-10,014	1.25%
Total: Ineligible	-2,831	5.65%	-46,773	5.85%
<i>Eligible sample</i>				
	47,301	94.35%	752,833	94.15%
Not located (estimated ineligible)	-355	0.71%	-4,717	0.59%
Not located (estimated eligible)	-3,803	7.59%	-53,473	6.69%
Total not located	-4,158	8.29%	-58,190	7.28%
<i>Located sample</i>				
	43,143	86.06%	694,644	86.87%
Requested removal from survey mailings	-374	0.75%	-6,217	0.78%
Returned blank	-481	0.96%	-7,208	0.90%
Skipped key questions	-62	0.12%	-1,043	0.13%
Did not return a survey (estimated ineligible)	-3,049	6.08%	-47,107	5.89%
Did not return a survey (estimated eligible)	-32,686	65.20%	-534,020	66.79%
Total: Non-response	-36,652	73.11%	-595,595	74.49%
<i>Usable responses</i>				
	6,491	12.95%	99,048	12.39%

In general, Spouse's residence address were used whenever possible. Member residence address were used next. The member's assigned or duty unit address was only when the residence address was incomplete or invalid. Procedures used to locate members are explained in a later section that describes the Survey Control System. Because of this address update procedure, only 8.29% of the drawn sample (4,158 of 50,132) was lost because members spouse addresses could not be located. Personnel records for this group had missing, incomplete, or out-of-date addresses on file, and steps designed to obtain complete, current addresses were unsuccessful.

Losses attributable to either ineligibility or unlocatability resulted in a sample that was 86.06% of the drawn sample. Individuals in this remaining sample may be further categorized as nonrespondents versus respondents. Nonrespondents included the following groups: sample members spouses who contacted the operations contractor (by mail, fax, e-mail, Web, or telephone) and asked to have their names removed from the survey mailing list, and 35,735 sample members who did not return a survey.

Respondents included all sample members who completed 50% of applicable questions. At the conclusion of the survey fielding, 6,491 eligible, locatable sample members had returned usable surveys.

Location, Response and Completion Rates

Beginning in 1995, DMDC standardized its methods for calculating response rates and completion rates using procedures patterned after those advocated by the Council of American Survey Research Organizations (CASRO). CASRO noted that varying operational definitions of response rates can lead to problems or confusion (e.g., when awarding contracts requiring pre-specified response rates or when interpreting the results of a survey). As a result, CASRO formed a task force to recommend guidelines for standardizing the operational definitions of response rates. The new DMDC procedures closely follow CASRO's Sample Type II design (see Council of American Survey Research Organizations, 1982). This definition corresponds to The American Association for Public Opinion Research (AAPOR) RR3 (AAPOR, 2008), which estimates the proportion of eligible cases among cases of unknown eligibility.

Table 5 provides location, response, and completion rate information. The location rate is defined as the proportion of eligible sample members that were located. The completion rate is defined as the proportion of the located sample that returned usable surveys. The response rate is defined as the proportion of eligible sample members that returned usable surveys.

Table 5.
Location Rates, Response Rates, and Completion Rates for Eligible Sample Members

Type of Rate	Computation	Observed Rates	Weighted Rates
Location	Adjusted located sample / Adjusted eligible sample	91%	92%
Completion	Usable responses / Adjusted located sample	16%	15%
Response	Usable responses / Adjusted eligible sample	15%	14%

Survey Development and Administration

The PEV7 2010 survey was administered by both web and paper-and-pencil questionnaires.

The survey was hosted on the operations contractor's secure Web site. Respondents entered the survey through a .mil site (<https://www.dmdc.osd.mil/dodsurvey>). The sample members entered their personal ticket numbers; the "Continue" redirected them to the operations contractor's secure Web site (<http://www.dodsurvey.net>). This site stated the source of the survey's certification. Sample members next saw a welcome page, which told them what the survey was about and gave them access to the frequently asked questions (FAQ). The welcome page also invited sample members to create a Personal Identification Number (PIN) and click "Continue." Next, members saw the Privacy Act Statement & Informed Consent Information. If the members agreed to do the survey, they clicked "Continue" to begin the survey.

Each survey question was displayed on its own Web page. For each question, the survey allowed respondents to return to the previous page, move forward to the next page, clear their

response(s), or save and exit the survey. Respondents answered questions by clicking on radio buttons, checking boxes, by choosing from a drop-down list, or text or numeric entry. If the respondent chose to save and return to the survey later, upon returning to the survey, the respondent was required to enter their ticket number and was brought back to the item from which they exited. The final page of the survey had the option to submit the survey or to return to the previous page. In addition to the navigation features, the survey featured smart skips. Based on previous answers, the respondents would only be shown questions for which they were applicable (see D for skip information). The survey was hosted on the operations contractor's secure Web site so that sample members could complete the survey online. At the entry point to the survey, sample members were prompted for their personal ticket number to gain entry to the survey. The Privacy Notice and a page of Frequently Asked Questions (FAQ's) were provided.

For those member spouses who had not responded to the Web survey were given an option to complete a paper-and-pencil survey. Approximately eight weeks following the notification mailing, a letter, paper survey, and a folded business reply envelope were mailed to all eligible sample on February 15, 2011.

Survey Administration

The survey administration process began in December 2010, with mailouts of announcement letters to sample members (minus original ineligible). Notifications were sent by e-mail within 24 hours after the survey was available on the Web and nine (9) reminder e-mails were sent to those for whom we had e-mail addresses. A member e-mail was also distributed. In addition, there were mailouts of up to four (4) reminder letters during the field period to those who hadn't submitted a survey. The dates of the mailouts are displayed in Table 7.

Table 6.
Mailing Timeline and Return Results

Survey Control System

The Survey Control System (SCS)⁷ was used to monitor the data collection process and to track all data transactions over the course of the survey administration. The datasets in the SCS include sample members' names and addresses, but do not contain data obtained from the survey instruments. Because of privacy concerns, SCS datasets are not available for public release.

The operations contractor uses the SCS to store and update project data, monitor mailings, respond to documents returned as postal non-deliverables (PNDs), and determine survey participation and eligibility status. The SCS consists of five datasets: the ORIGDAT file, the ADDRESS file, the MASTER file, the HISTORY file, and the MAILING file. The files are linked relationally by INRECNO, a unique individual identification number that is assigned to each sample member when the record was loaded into the SCS. Figure 1 displays the interrelationships among those datasets.

⁷ In this document, the term SCS refers to the set of data files as well as the program or operating system which maintains those files.

ADDRESS file was initially loaded with postal and e-mail addresses from the ORIGDAT file. Each record in the ADDRESS file includes the sample member's INRECNO, address, the source of the address, and address priority code, a variable indicating whether the record is the highest priority address for this sample member, and variables indicating whether the address successfully reached the sample member.

The priority code assigned to a given address number for a sample member was used to determine the "best" or "highest priority" address for the sample member at any given time. It was originally determined by the source of the address. Address updates obtained directly from a sample member received a priority number of one. The order of priority of address sources from "highest priority" to "lowest priority" is as follows, respectively:

1. updates directly from a sample member (call, fax, e-mail, Web update or letter)
2. address corrections from the U.S. postal service (ACS [electronic address change service], ACRs [address correction requests], and ODFs [out-of-date-forwarded mail])
3. NCOA-updated addresses
4. credit bureau-updated addresses
5. DEERS residential addresses
6. DEERS unit addresses

MASTER file. The MASTER file is used by the SCS to select records for upcoming survey mailings. This file includes a record for each member of the sample and was initially created by extracting data from each record in the ORIGDAT file. Each MASTER record includes the sample member INRECNO and the address number for the highest priority postal and e-mail address in the ADDRESS file for this sample member. The MASTER file accommodated data updates through an automated process (e.g., updating the address number in use after the receipt of a postal or e-mail nondeliverable or Web update) or manual key entry (e.g., updating information in response to a telephone call, fax, letter return or e-mail from a sample member). As new information was received for a particular record (including changes to the highest priority address), the SCS updated the MASTER record (N=50,132) and wrote the old record to the HISTORY file. The MASTER file also contains a set of variables which summarize the sample member's mailings status.

HISTORY file. The HISTORY file is a chronicle of the changes that occurred to the MASTER file. Each HISTORY record is a subset of an outdated MASTER record with the addition of a date and time stamp as the record is updated. That is, a HISTORY record is created when there is a name, address, paygrade, or eligibility status change in the MASTER file. Thus, the HISTORY file contains as many observations as there are updates to the MASTER file.

MAILING file. The MAILING file tracked all survey mailings (postal and e-mail). This file contains one record for either an item postal mailed or e-mailed during the survey administration or for tracking postal address updates from credit bureaus (N=362,694). Each

MAILING record includes the INRECNO, address number used, date of mailing, mailing status, type of mailing, and the mailing identification code (MIC).

Address Update Procedures

Initial Address Updates

Prior to the first mailing, the operations contractor ran all domestic residential addresses through Satori⁸ software to be formatted to conform to U.S. Postal Service standards. Once the addresses were standardized, they were sent to an outside vendor where they were checked against the National Change of Address (NCOA) database. The NCOA software updated the address records (in standardized format) based on change-of-address cards filed with the U.S. Postal Service. The updated NCOA address file was returned to the operations contractor and integrated into the SCS. The NCOA-updated addresses were added to the ADDRESS file and became the current ADDRNO with the “highest priority code assigned” in the MASTER file.

After the NCOA-updated data was added to the SCS, another file was compiled of sample members who had an incomplete address or an address identified by NCOA as an undocumented move (i.e., the sample member had moved, but NCOA did not have a new address). The operations contractor sent copies of this file to three credit bureaus (Experian, Trans Union and CSC Credit Services)⁹ to determine whether a complete, up-to-date address for these sample members could be found. The results were integrated into the SCS, updating records in the ADDRESS file.

Ongoing Address Updates

Address update procedures also occurred when (a) additional address records were received after NCOA processing, (b) a survey document was returned as undeliverable, (c) a sample member self-reported a name, rank, or address change, or (d) the U.S. Postal Service forwarded address correction information. Figure 2 outlines these procedures.

⁸ Satori Software is a non-exclusive NCOA^{Link}® Full Service Provider Licensee and RDI™ Licensee of United States Postal Service®.

⁹ Experian, Trans Union and CSC Credit Services are outside vendors with consumer-credit information databases. Social security numbers of sample members with incomplete or out-of-date address information were forwarded to the vendors via a web-based tool that uses encryption in the transmission for address updates when the mailing dataset contained no valid address.

Figure 2.
Address Updating Procedures

As a new address was entered into the ADDRESS file, its source (NCOA, credit bureau, postal Address Correction Requested card, telephone call, fax, letter, Web, or e-mail) was recorded and a new address number was assigned. The priority assigned to the address was based upon the source of the update and the date and time of the address (see the description of priority, for the ADDRESS file). At any given time, the current address used corresponded to the address number with the highest priority code.

If all known addresses for a sample member were returned Postal Non-Deliverable Mail (PND), the sample member's record in the MASTER file was flagged "no address available." All "no address available" records were forwarded to the three credit bureaus. The credit

bureaus returned files containing addresses for each submitted record, with the date on which the credit bureau received the address. If more than one address for a sample member was received from credit bureaus, the address number corresponding to the address with the most recent receipt date received the highest priority code. If one or more of the credit bureaus returned a previously unattempted address, the MASTER and ADDRESS files were updated and a re-mail was sent to the sample member. If none of the vendors had an updated address for the sample member, the operations contractor designated the sample member “nonlocatable” and stopped further mailings.

Processing of Updates

Updates from Sample Members

Sample members could provide an updated address in a variety of ways. Updates from sample members could be communicated via the toll-free telephone number (either by speaking to the operations contractor’s Call Center staff or by leaving a voice mail message). In addition, sample members could mail, fax or e-mail updates or go to the survey Web site and enter updates. Updates made on the Web site were loaded directly into the SCS every three days to coincide with the mailing schedule. Other updates were entered into the SCS by the operations contractor’s Call Center staff to coincide with the notification mailing or re-mailing schedule.

Updates from the U.S. Postal Service

There are several types of address updates provided by the postal service. They are detailed below; each includes a description of the processing steps.

1. Postal Non-Deliverable Mail (PND): The sample member moved and no forwarding address was available. The mail piece was returned to the operations contractor. The operations contractor removed the letter from the envelope and scanned it to capture the Mailing Identification Code (MIC) in the lower right corner. A file of the MICs was loaded to the SCS so the records could be updated as PND. This was done as necessary to coincide with the mailing/re-mailing schedule. If the sample member had another address on file (e.g., the unit address), that address was used for the next mailing. If no alternate address was on file, the Social Security Number was sent to the credit bureaus in search of a new address.
2. Address Correction Requests (ACR; hard-copy): The outbound envelopes contained the endorsement “Address Service Requested.” The post office provided the corrections via hard copy cards that were sent to the operations contractor. The corrections were entered into the SCS by the operations contractor’s Call Center staff, typically by close of business the next day but no later than prior to the preparation of the next mailing.

Survey Materials and Their Distribution

Each eligible sample member received at most six (6) original mailings: an announcement letter, four reminder mailings and a paper survey mailing that included a return

envelope. Each mailing contained a letter. A sample of letters and e-mail communications is provided in B.

In addition, e-mail was used to communicate with sample members. Not every sample member had an e-mail address. However, for those sample members for whom we had an e-mail address, they received at most ten (10) e-mails; an announcement and nine reminders. An additional email communication was sent to the active duty members as well.

General Mailing Procedures

Prior to every mailing, the SCS searched the records in the MASTER file to identify which records should be excluded (e.g., sample members self-reported as ineligible for survey participation, sample members who had already returned survey forms, and members with no valid addresses available). For re-mails (sent between mailings), the SCS identified only those records that had been updated since the prior mailing. More specifically, the SCS identified records that had resulted in PNDs or had been manually flagged for re-mailing (e.g., in response to a sample member calling the operations contractor stating she or he had received a reminder/thank you letter but had not received a survey, etc.).

Once all records for a particular mailing or re-mailing were identified, the SCS processed the records. If the mailing group was large enough to lead to a cost savings from sorting, the records were run through Satori¹⁰ postal software to sort the records according to first-class presort postal regulations. After this procedure, a unique Mail Identification Code (MIC) was assigned to each record. The MIC was assigned either from the survey lithocode list if a survey form was sent or independently if only a letter was sent.

Ticket Numbers for Web Survey Access

Prior to the first mailing, a list of ticket numbers¹¹ for Web survey access was randomly generated. One secure ticket number was assigned to each sample member and remained linked to that member for the duration of the project. That is, while a member's MIC or lithocode changed with each mailing as described previously, the member's ticket number did not change. The member's unique ticket number was printed (along with the survey URL) in each letter and e-mail sent to that individual. A member could not access the Web survey without using his or her ticket number.

Description of Letters

Letters were printed with the record's unique MIC listed in the address field and on the lower right corner of the letter. The announcement and reminder letters were folded and machine inserted into window envelopes and sent by first class mail. The paper survey and cover letter were not folded, but sent with a return envelope in a larger envelope. The MIC on the cover letter was used to pair the letter with the correct survey. During the matching process, ten percent of the mailing was visually checked, comparing numbers printed on the letter with

¹⁰ Satori Software is a non-exclusive NCOA^{Link®} Full Service Provider Licensee and RDITM Licensee of United States Postal Service®.

¹¹ Ticket numbers are eight alpha numeric characters generated at random.

the survey number for quality control. Any mismatched pairs initiated further investigation of the matching process. This procedure ensured that each survey was sent to the person designated to receive it. Depending on the sample size, the letters and matched surveys were machine or hand inserted into envelopes, metered if necessary, and sent by first class mail.

The status of each mailing was tracked throughout the data collection so that address-correction information could be incorporated into all relevant mailings. When a mail piece came back PND, the next mail piece was sent to a new address (if one could be obtained during the mailing period). For all mail pieces that came back PND, re-mails were completed if a newer/updated address could be found.

DMDC provided the operations contractor with the text, letterhead and signature for the cover letters. The letters explained why the survey was being conducted, how the survey information would be used, and why participation was important. See B for copies of the letters. The letters were approved and printed on letterhead from the Federal Voting Assistance Program (FVAP) and signed by the FVAP Director, Bob Carey.

The letterhead was printed in blue and red, the signature in black, and the text and recipient information of all letters were printed in black. In addition to including a name and address (which was also used as the mailing information for the window envelopes), each letter included a personalized salutation. The salutation addressed each sample member by his/her name. When spouse name was missing, the salutation was Dear Spouse of (Rank) Member Name. When the spouse name and member rank abbreviation were unknown or missing, the salutation was Dear Spouse.

Mailouts

Table 7 lists the mailing dates and return results for each of the mailouts and re-mailings. For the notification mailing, a letter was inserted into a #10 window envelope. The letter notified sample members that they were selected for this Web survey and encouraged their participation announcing the availability of the Web survey. The announcement letter was mailed to 47,972 active duty spouse sample members on December 16, 2010.

The first reminder informed sample members of the live Web survey date and requested participation. For this mailing, a reminder letter was inserted into a #10 window envelope. The first reminder letter was mailed to 46,489 spouses of active duty members on January 25, 2011.

Approximately eight weeks following the notification mailing, eligible sample members who had not yet responded to the Web survey received the option to complete a paper survey. For this mailing, a letter, paper survey, and a folded business reply envelope were provided. The survey packet was mailed to 45,925 sample members.

A second reminder letter was sent to 45,329 spouses of active duty members. The mailing was sent out February 22, 2011. The letter, inserted into a #10 window envelope, thanked sample members for completing the survey if they had done so, and reminded them to complete the survey if they had not.

A third reminder letter was sent to 44,901 spouses of active duty members. The mailing was sent out February 28, 2011. The letter, inserted into a #10 window envelope, thanked sample members for completing the survey if they had done so, and reminded them to complete the survey.

The fourth and final reminder letter was sent to 43,533 spouses of active duty members on March 4, 2011. The letter, inserted into a #10 window envelope, thanked sample members for completing the survey if they had done so, and reminded them to complete the survey.

E-mail was also used to communicate with sample members. There were three sources for e-mails. First, each sample member had the opportunity to provide up to two personal e-mail addresses on the survey Internet site prior to start of the survey. The second source for e-mail addresses was the DEERS database. The third source were e-mail addresses purchased from an outside vendor (N=3,619). The outside vendor maintains a customer database of e-mail addresses that has been lawfully collected and compiled from consumers pursuant to a notice that advised them that their personal data was being collected. Table 8 displays the percent of sample members for whom we had at least one valid e-mail by Service.

Table 7.
E-mail Address Availability by Service

	Valid address available
Army	20%
Navy	15%
Marine Corp	12%
Air Force	25%
Coast Guard	14%
Active Duty Total	19%

At the start of the survey, sample members with e-mail addresses received an announcement which informed them the survey was active and ready for completion. An additional nine (9) e-mail reminders were sent throughout the survey field period. Table 9 lists the e-mail dates and e-mail addresses bounced. E-mail addresses “bounced” identifies sampled individuals that supplied an e-mail address but the address was invalid at the time the operations contractor attempted contact. This is analogous to a postal PND. E-mail address “sent” is not the same as e-mail received. It is analogous to the non-PND return experienced during a mailed survey. It is not known if the mail was delivered to the intended individual, only that it was not returned.

Table 8.
E-mail Communication Timeline

E-mail Numbers	E-mail Drop Date	Number Sent	Number Bounced
Announcement	12/20/10	10753	9
Reminder 1	12/23/10	10505	1700
Reminder 2	12/29/10	8596	28
Reminder 3	1/6/11	8453	34
Reminder 4	1/13/11	8174	20
Reminder 5	1/20/11	8039	24
Reminder 6	1/26/11	7913	28
Reminder 7	2/18/11	7685	81
Reminder 8	3/8/11	7397	37
Reminder 9	3/11/11	7188	23
Member Email	2/14/11	44364	unavailable

Processing Returned Surveys

Once a respondent completes the survey, data are stored in an indexed file on the Web (data) server. Prior to providing each dataset to DMDC, the operations contractor copied the indexed file to their internal network using FTP protocol.

The data are then converted to a sequential format, and the validate program reads and loads the data to the dataset.

DMDC Coding Scheme

To convert the raw data into the item scores that appear in the basic survey data files DMDC provided the operations contractor with an annotated copy of the survey form (see Appendix D) and the coding notes (see Appendix E). Every attempt is made to capture all information from completed surveys and preserve the data so that secondary analysts can later create variables that were not anticipated by DMDC researchers. To accomplish these goals, DMDC subscribes to a variety of coding conventions for all of its surveys. See Appendix E for in-depth coverage of these coding conventions.

DMDC uses “forward” coding when coding inconsistent answers in items with skip patterns. Data on the starting question accepted as marked and data for the items within the skip pattern are edited to be consistent with the starting question. However, an unedited version of each item is preserved in a full survey dataset. By preserving the unedited data, recoding can be done if ever required.

For Web respondents, the coding scheme is used to “smart skip” respondents. This does not allow respondents to view questions that they have indicated with previous answers do not apply to them. For example, if a respondent indicated on Question 1 (SRMARST = 3, 4, or 5) that they are divorced, widowed, or never married, they did not see the remaining items in the

survey. Only those who indicated they are married or separated (denoting eligibility) are shown the rest of the items. For paper-and-pencil surveys “Go to” question criteria was used to skip items.

Coding or Keying Open-Ended Items

The Web survey contained 2 open-ended comment items and several specify items. Paper-and-pencil survey used only 1 open ended comment item. The original text responses from the “Comment” response options and specify items were captured verbatim into a SAS[®] data set that is linked by the unique identification to the survey data. Text data in the SAS[®] files for open-ended items were spell-checked, and profanity, proper names, and locations were replaced with “(expletive),” “(name)”, and “(location)” respectively.

For all open-ended items, the Web data file contains a flag indicating whether the respondent wrote anything in response to the item. Discrepancies existed where the Web data indicated presence of a comment but no comment was there.

Fifty-Record Check

After receiving the first 50 returned records from Web survey, the operations contractor performed a “50-record check.” Similar process was followed for paper-and pencil surveys separately. This is a check to verify that the coding scheme and skip patterns are working. DMDC checked the resulting skip logic to determine if there were any unanticipated problems in the coding procedures (e.g., respondents were consistently answering in an unexpected manner). Minor corrections to these procedures were necessary as a result of this check and were reviewed by DMDC prior to production of the initial SAS[®] dataset. At the completion of the 50-record check, the operations contractor compiled the full set of returned surveys. The data were then cleaned and edited following the coding scheme.

Survey Analysis Files

This section (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files created for the 2010 survey, (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

Estimation

Analysis of this data requires use of weights to compensate for the unequal selection probabilities and to account for differential nonresponse among population subgroups. The analytic weights were poststratified to population totals so that weighted sample estimates would reflect population values.

In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions), tests of hypotheses, regression relations, and their associated variances are derived from the probability structure that gives rise to the

observations. As with other surveys involving complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The variances are, therefore, approximated. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the coefficient of variation $[SE(x)/x]$ of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Two common variance estimation methods for complex sample data are linearization (Taylor series approximation) and replication. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys, including Taylor series approximation and replication methods.

Many of the standard statistical software packages, such as SPSS¹² and older versions of SAS,¹³ compute variance estimates only for simple random samples. Using standard statistical programs with the appropriate eligibility indicator (ELIGFLGW) and the analytic weight (FINALWGT) to analyze this data will produce accurate point estimates, but variance estimates will not account for the complex sample design. Variables have been included in the analysis file so that Taylor series estimates can be computed for a stratified without replacement design, using either SUDAAN¹⁴ or the recently available SAS Survey Procedures.

Data Structure

Care was taken in the preparation of the survey analysis files to provide basic access to data from the survey with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the basic-release files either because (a) they provide too great a chance of identifying an individual or (b) they are not needed to analyze the survey data. For the latter reason, some demographic variables are available on basic files only in a collapsed version. In addition to a basic-release file, a confidential file (containing a more complete set of variables than the basic-release file) has been prepared for internal DMDC use. Files were prepared as SAS and SPSS system files. An ASCII (Operating System or OS) flat file was prepared from the basic-release SAS system file. File names are indicated in Table 10.

¹² SPSS® is a registered trademark of SPSS Inc., Chicago, IL, USA.

¹³ SAS added survey procedures in Version 7, expanding them in releases 8.0 and higher.

¹⁴ SUDAAN® is a registered trademark of Research Triangle Institute, Research Triangle Park, NC, USA.

Table 9.
Analysis File Names

Type of File	File Name
Basic-release File – SAS	PEV71001P.7BDAT
Full Survey File – SAS	PEV71001C.7BDAT
Basic-release File - SPSS	PEV71001P.SAV
Basic-release File – OS	PEV71001P.DAT

The structure of the full survey file is shown in Figure 3. The full survey file contains the basic-release file plus additional full survey variables. All variables in the full survey file are documented in this report. Appendices F and G list all variables with a notation to indicate which variables are confidential and show where each variable is documented. Intermediate weighting variables that appear only in the full survey file are documented by DMDC (2011a). Variables that appear in collapsed form in the basic-release part of the file and in a fuller version only in the full survey file are discussed later.

Analyses

Both the full survey file and basic-release file contain 50,132 records, one for every sampled individual, 47,301 of whom were eligible according to administrative records as of June 2010.

As depicted in Figure 3, these records can be divided into 4 subgroups. The *Non-response unweighted* subgroup, includes all records indicated by ELIGFLGW=3, where no usable Web response was received or no information was received to indicate ineligibility (n=40,810).

Assignment of a record to the other two subgroups was based on whether (a) an individual returned a “completed” survey; and (b) the person was eligible to be included in the population of interest. For active duty members, final eligibility was limited to those in the July 2010 Active Duty Master Edit File (ADMF) and who were also in the July 2010 Defense Enrollment Eligibility Reporting System (DEERS) Medical Point-in-Time Extract (PITE) and did not contact the operations contractor to indicate that they were ineligible. Records that did not meet this requirement were assigned as *Record ineligible unweighted*. Records that respondents had self- or proxy-reported as ineligible due to death, illness, incarceration, or separated from Service were assigned as *Ineligible weighted*.

Records required for analyses of questions are those in the *Ineligible weighted* and *Eligible weighted* subgroups. Both the *Eligible weighted* (ELIGFLGW=1) and *Ineligible weighted* (ELIGFLGW=2) are included because both types of records were used to develop weights that sum to the population total, and both types of records are needed to compute accurate variance estimates by the Taylor series linearization method implemented by SUDAAN and SAS PROC SURVEYMEANS.

To analyze the Web responses, use the analytic weight, FINALWGT, with the file subset by ELIGFLGW.

Figure 3.
The Structure of the Full Survey File

Subgroups	Basic Survey File	Confidential and Detailed Methodological Variables	Web Eligibility Flag Value and Number of Records
Record ineligible unweighted			ELIGFLGW=4 n=2,140
Non-response unweighted			ELIGFLGW=3 n=40,810
Ineligible weighted			ELIGFLGW=2 n=691
Eligible weighted			ELIGFLGW=1 n=6,491

Note. The shaded portion represents the subset of the data typically required for analysis.

Variables in the Survey Analysis Files

Basic-survey Dataset

The variables in the basic-survey dataset fall into five categories: (1) information gathered on the survey, (2) variables constructed for analysis, (3) information on operations, (4) information from sampling and record data, and (5) information on weighting. Variables are grouped in these categories in Appendices G and H.

Information gathered on the survey. These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality. The annotated questionnaire (see Appendix D) contains the item names, the values used to code the pre-specified alternatives, and references to applicable coding notes in Appendix E.

DMDC uses a standard naming convention for most variables. In general, the survey-derived variables can be classified as variables that begin with either “SR,” or “X.” The “SR” variables are a set of primarily demographic items that are identically named across all DMDC

surveys. The “SR” serves as a mnemonic for self-report with the remainder of the name indicating the data being collected. For example, “SRRACEA - SRRACEE” are the variable names for the item that asks sample members what race they consider themselves to be. Although all survey data are self-reported, the “SR” is used to distinguish survey-reported information from DMDC-provided information (e.g., the variable “SRRACEA” from the survey is differentiated from the variable “RACE” from DMDC databases). When possible, “X” is reserved to create special crossing (marginal) variables for key analyses. “X” variables typically involve imputation for missing data and, like “SR” variables, are intended to be consistent across DMDC surveys. For more information on variable naming conventions, see Appendix E.

Variables constructed for analysis. An “R” as the last letter of a variable listed in Appendices F, G, and H is an indication that the variables may have been recoded to create special analysis. For example, INTERESTR is a recoding of INTEREST. Only one version of each variable is available in basic-dataset. For example, certain demographic variables, including some information collected on the survey, had to be censored to preserve the anonymity promised to survey respondents and nonrespondents.

Certain key demographic variables were constructed for DMDC analyses. These analytic variables, starting with “X,” are based primarily on self-reported information from the survey. Typically, where the self-reported information was missing on important demographics (e.g., Service, paygrade, location, or respondent gender) data were imputed from members’ administrative record.

The race and ethnicity questions were combined to be reported in accordance with the Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (1997). Also, items were combined to derive employment indicators based on U.S. Census Bureau’s Decennial Census and Current Population Survey (2002).

Appendix J documents many of the decisions made in the analyses reported by DMDC (2011b). For a large number of survey items, analysts must make decisions on the treatment of special codes (such as Not Applicable).

Information on operations. The DMDC-provided identification number, 2010 PEV7, is unique and is used to identify responses as they are processed. Other variables are created by the operations contractor but are too detailed to be in the basic-release file.

Information from sampling and record data. Most of the variables used in sample design and selection are too detailed to be in the basic-release file (see the later section on confidential variables).

Information on weighting. Derivation of weights is discussed in detail in DMDC (2011a).

ELIGFLGW	Eligibility Flag
FINALWGT	Final Weight with Non-response and Postratification Adjustments
V_STRAT	Variance Estimation Strata
TOTAL	Stratum Population Totals Based on Sampling Frame Counts

Full Survey Dataset

In addition to variables on the basic-survey dataset, the full survey dataset also has five additional categories of variables: (1) the raw version of survey items that appear in a collapsed form in the basic-release section, (2) the raw version of key demographic variables used in analyses that appear in a collapsed form in the basic-release section, (3) detailed variables created by the operations contractor to document operations, (4) detailed variables used in sampling, and (5) detailed variables used in weighting. Variables are grouped in these categories in Appendices F, G and H.

Confidential variables—survey data. This section of the full survey dataset contains the original survey variables that had a recoded version in the basic-survey dataset. To the extent possible, recoded versions of these variables are in the basic-release file section under variables constructed for analysis.

Confidential variables—analysis data. This section of the full survey dataset contains the analytic variables constructed by DMDC. To the extent possible, recoded versions of these variables are in the basic-survey dataset section under variables constructed for analysis.

Confidential variables—operations data. This section of the full survey dataset contains operational variables created by the operations contractor. These variables are useful for methodological studies and/or were used in determining eligibility and response status.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. LITHO is the lithocode scanned from the survey. BATCH and SERIAL are the codes printed on the survey during scanning to identify the scan batch number and scan order of each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). DUPRET and DUPRET2 indicate the receipt of multiple returns. DUPRET2 includes blank returns in the multiple counts; DUPRET excludes these returns.

The classification variables describe how individual sample member's records were grouped and indexed. FLAG_FIN indicates the final disposition status of a sample member (i.e., survey returned, blank survey returned, not locatable, or no return). Several other classification variables were used to categorize a survey's final disposition. These variables are: BLKREAS, SCSINEL, and REFUSE. BLKREAS codes the reason given by the sample member for returning a blank survey, SCSINEL indicates the reason given by the sample member for being ineligible, and REFUSE indicates whether a sample member refused to complete a survey.

Confidential variables—sampling and record data. This section of the full survey dataset contains administrative file variables and constructed variables used in determining the sampling design. It also includes the sampling strata identifiers and counts.

Confidential variables—weighting. This section of the full survey dataset contains variables used in analysis of non-response and in the construction of the weights.

- documented in Appendix E. Appendices F and G contain a full listing of the basic-release file variables, as well as short descriptions of what the variables document.
3. Survey item text. For survey items, this text is the verbatim item wording. For other variables, this text provides a verbal description of the variable.
 4. Location of the item on the OS data file. This block provides the location of the variable on the OS data file. The OS data block documents (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy.
 5. SAS data file information. This block indicates format name, variable type (character or number), length and informat of the data in the SAS[®] data file. The last block indicates the informat appropriate for reading the data from the OS data file.
 6. Counts of item value responses. This column indicates the number of sample members who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 50,132 records in the accompanying database. Before running complex statistical analyses, analysts are encouraged to re-create these frequency tables. Re-creating the counts minimally ensures that the data are being correctly read by the analysts' computers and programs.
 7. Respondent percentages for each value. This column indicates the percentage of sample members who marked each variable value. The percentages are calculated by dividing the row value in the "FREQ" column by the total listed at the bottom of the "FREQ" column. The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 73,244 records in the accompanying database.
 8. Response OS values. This column presents the OS (ASCII) code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix E. For example, all negative values are found in Appendix E.
 9. Response SAS[®] values. This column presents the SAS[®] code for the response values for each variable. Further details on the values in this column are found in either the annotated survey form or in Appendix E. An explanation of negative values is presented in Appendix E.
 10. Explanation of the item value codes. This column presents brief verbal explanations of the OS and SAS[®] coding for each survey item. If the coded information corresponds to survey response alternatives, the text in the table is the verbatim response from the survey instrument. More detailed explanations are presented in the annotated survey form (Appendix D) and in Appendix E.

11. Total of response frequencies and percentages. The number appearing at the bottom of the “FREQ” column is the total number of sample members in the basic-release file. This number is the same for every table in this codebook. That is, every sample member in the database is accounted for on every variable even if the variable indicates only that the information was missing for that sample member. The number appearing at the bottom of the “PERCENT” column is typically 100.0. Rounding error, however, occasionally causes the total percentage to be slightly above or below 100.0.
12. Messages to analysts. The messages alert analysts to situations specific to a variable including (a) rounding errors resulting in a total percentage other than 100 percent; (b) the variable having values that are “too numerous to list;” (c) extraction of the variable from another specified database; (d) creation of the variable from two or more variables specified in the message; and (e) further clarification of the survey item corresponding to the variable.
13. Codebook page number. This is the Appendix H page number corresponding to a specific variable. Appendices F and G identify the page number in Appendix H where the variable can be found.

COMPLETION INSTRUCTIONS

- Use a blue or black pen.
- Place an "X" in the appropriate box or boxes.
RIGHT WRONG
- To change an answer, completely black out the wrong answer and put an "X" in the correct box as shown below.
CORRECT ANSWER INCORRECT ANSWER

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

In accordance with the Privacy Act, this notice informs you of the purpose of the survey and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully. **Returning this survey indicates your agreement to participate in this research.**

AUTHORITY: The authority to solicit the information requested in this survey is contained in the Uniformed and Overseas Citizens Absentee Voting Act of 1986, Section 101.b (1), 42 USC §1973ff (UOCAVA) and the Military and Overseas Voter Empowerment Act (MOVE Act), a subtitle of the National Defense Authorization Act for Fiscal Year 2010.

PRINCIPAL PURPOSE: Information collected in this survey will be used to evaluate the effectiveness of assistance under UOCAVA, as amended in November 2009 by the MOVE Act, in the 2010 election. Reports will be provided to Federal Voting Assistance Program (FVAP). Previous survey results have affected decisions in critical areas such as establishing advertising campaigns geared towards 18-21 year old uniformed service members, utilizing social networking sites to encourage voter participation, and developing online Federal Post Card Application and Federal Write-In Absentee Ballot wizards. Survey results are also the basis for the Legislative Initiative scoring index that annually measures FVAP's success in convincing States to adopt their recommendations. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the Web: <http://www.dmdc.osd.mil/surveys/>

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people can complete the survey in 20 minutes. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, gender). This is your chance to be heard on issues that directly affect you, including sources of voting information and assistance, satisfaction with voting information and assistance, and voting in the 2010 election. While there is no direct benefit for your individual participation, your responses on this survey *make a difference*.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses. Survey data may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

If you experience any difficulties taking the survey, please contact the Survey Processing Center by sending an e-mail to ADMSSurvey@osd.pentagon.mil or call, toll-free, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact: Ms. Caroline Miner, Human Research Protection Program Manager for the Office of the Under Secretary of Defense (P&R), HRPP@tma.osd.mil (703) 575-2677.

After you submit your survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to March 15, 2011. Please include in the e-mail or phone message your name and Ticket Number. Unless withdrawn, partially completed survey data may be used after that date.

BACKGROUND INFORMATION

1. What is your marital status?

- Married
- Separated
- Divorced ⇒ GO TO Q64
- Widowed ⇒ GO TO Q64
- Never married ⇒ GO TO Q64

2. Was your spouse serving on active duty on November 2, 2010?

- Yes
- No ⇒ GO TO Q64

3. Were you a U.S. citizen on November 2, 2010?

- Yes
- No ⇒ GO TO Q56

4. Your legal voting residence is the state or territory that you claim as your legal residence even though you may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your legal voting residence? *Please enter your postal code for one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession.*

--	--

5. As of November 2, 2010, did you live more than 50 miles from your legal voting residence?

- Yes
- No

6. Are you Spanish/Hispanic/Latino?

- No, not Spanish/Hispanic/Latino
- Yes, Mexican, Mexican-American, Chicano, Puerto Rican, Cuban, or other Spanish/Hispanic/Latino

7. What is your race? *Mark one or more races to indicate what race you consider yourself to be.*

- White
- Black or African American
- American Indian or Alaska Native
- Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, or Vietnamese)
- Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian or Chamorro)

8. What was your age on November 2, 2010?

- 17 years old or younger ⇒ GO TO Q64
- 18 to 24 years old
- 25 to 29 years old
- 30 to 34 years old
- 35 to 44 years old
- 45 years old or older

9. On November 2, 2010, were you living in the United States/territories, or overseas?

- United States/territories ⇒ GO TO Q11
- Overseas

10. As of November 2, 2010, how long had you been living in this country?

- Less than 6 months
- 6 months to less than 1 year
- 1 year to less than 2 years
- 2 years to less than 3 years
- 3 years or more

2010 ELECTION

11. Some states provide voter registration verification Web sites. Did your state of legal voting residence provide this type of Web site?

- Yes
- No
- Don't know

12. In 2010, were you registered to vote in the United States?

- Yes
- No

13. How interested or uninterested were you in the U.S. elections held on November 2, 2010?

- Very interested
- Somewhat interested
- Neither interested nor uninterested
- Somewhat uninterested
- Very uninterested

14. A lot of people were not able to vote because they weren't registered, they were sick, they did not have time, or something else happened to prevent them from voting. And sometimes, people who USUALLY vote or who PLANNED to vote forget that something UNUSUAL happened on election day this year that prevented them from voting THIS time. Please think about the election held on November 2, 2010 and past elections in which you may have voted. During the past 6 years, did you usually vote in national, state, and local elections, or did you usually not vote?

- Usually voted
- Usually did not vote ⇒ GO TO Q16

15. Do you usually vote in... Mark "Yes" or "No" for each item.

	No	
	Yes	
a. State and local elections?	<input type="checkbox"/>	<input type="checkbox"/>
b. National elections?	<input type="checkbox"/>	<input type="checkbox"/>

16. During the months leading up to the election held on November 2, 2010, what were your voting plans?

- I planned to vote.
- I did not plan to vote.

17. In the election held on November 2, 2010, did you definitely vote in person on election day, definitely complete an absentee ballot by mail, e-mail/fax, or online on or before November 2, 2010, definitely not vote, or are you not completely sure whether you voted in that election?

- Definitely voted in person ⇒ GO TO Q51
- Definitely voted by mail, e-mail, fax, or online ⇒ GO TO Q19
- Definitely did not vote ⇒ GO TO Q18
- Not sure ⇒ GO TO Q51

ABSENTEE BALLOTS

18. Even though you did not vote, did you request an absentee ballot for the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q33

19. When did you first request your absentee ballot for the November 2, 2010 election? If you do not recall the exact date, enter your best guess. If you think it was early in the month, enter "1", if you think it was late in the month, enter "28".

- I cannot recall well enough to even guess. ⇒ GO TO Q20

M	M	D	D
---	---	---	---

20. The Federal Post Card Application (FPCA; Standard Form 76) is a request for registration and a regular (as opposed to back-up) absentee ballot. Some states require eligible voters who vote absentee to use the Federal Post Card Application (FPCA) to request an absentee ballot. Did you use the FPCA to request your absentee ballot for the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q23

21. Did you obtain your Federal Post Card Application (FPCA) for the November 2, 2010 election from any of the following sources? Mark "Yes" or "No" for each item.

	No	Yes
a. A printable FPCA downloaded from the FVAP Web site that you filled out by hand ..	<input type="checkbox"/>	<input type="checkbox"/>
b. FVAP's automated assistant for filling out the FPCA online.....	<input type="checkbox"/>	<input type="checkbox"/>
c. From FVAP, but not through the FVAP Web site	<input type="checkbox"/>	<input type="checkbox"/>
d. From a state or local election official	<input type="checkbox"/>	<input type="checkbox"/>
e. From my spouse	<input type="checkbox"/>	<input type="checkbox"/>
f. Some other source.....	<input type="checkbox"/>	<input type="checkbox"/>

22. Did you receive notification from a local election official that your Federal Post Card Application (FPCA) had been... Mark one answer in each row.

	Do not recall	No	Yes
a. Received?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Rejected?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Accepted?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

23. Did you receive your regular absentee ballot for the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q28
- Do not recall ⇒ GO TO Q28

24. How did you obtain your regular absentee ballot in 2010? Mark "Yes" or "No" for each item.

	No	Yes
a. Mail.....	<input type="checkbox"/>	<input type="checkbox"/>
b. Fax	<input type="checkbox"/>	<input type="checkbox"/>
c. E-mail.....	<input type="checkbox"/>	<input type="checkbox"/>
d. Downloaded ballot from state voting Web site.....	<input type="checkbox"/>	<input type="checkbox"/>
e. Downloaded ballot from State link on the FVAP Web site	<input type="checkbox"/>	<input type="checkbox"/>
f. Downloaded ballot from State link at another Web site	<input type="checkbox"/>	<input type="checkbox"/>
g. From my spouse	<input type="checkbox"/>	<input type="checkbox"/>
h. Other	<input type="checkbox"/>	<input type="checkbox"/>

25. When did you receive your regular absentee ballot for the November 2, 2010 election? If you do not recall the exact date, enter your best guess. If you think it was early in the month, enter "1", if you think it was late in the month, enter "28".

- I cannot recall well enough to even guess. ⇒ GO TO Q26

M	M	D	D
---	---	---	---

26. Did you complete and return your regular absentee ballot for the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q28

27. When did you complete and return your regular absentee ballot for the November 2, 2010 election? If you do not recall the exact date, enter your best guess. If you think it was early in the month, enter "1", if you think it was late in the month, enter "28".

- I cannot recall well enough to even guess. ⇒ GO TO Q28

M	M	D	D
---	---	---	---

28. How satisfied or dissatisfied were you, in general, with the... Mark one answer for each item.

	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very Satisfied
a. Process of registering to vote?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Process of requesting an absentee ballot?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Absentee ballot delivery process? ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Process of completing an absentee ballot?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Process of returning an absentee ballot to your local election official? .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. The overall absentee voting process?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

29. The Federal Write-In Absentee Ballot (FWAB; Standard Form 186) is a back-up ballot completed and returned if you are overseas and do not receive your regular absentee ballot. Were you aware that you could use the FWAB for the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q33

30. Did you use the Federal Write-In Absentee Ballot (FWAB) in the November 2, 2010 election?

- Yes
- No ⇒ GO TO Q33

31. Did you obtain your Federal Write-In Absentee Ballot (FWAB) for the November 2, 2010 election from any of the following sources? *Mark "Yes" or "No" for each item.*

	Yes	No
a. A printable FPCA downloaded from the FVAP Web site that you filled out by hand....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. FVAP's automated assistant for filling out the FPCA online.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. From some other contact with FVAP	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
d. Through military channels.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
e. From a U.S. embassy or consulate	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
f. From a state or local election official	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
g. From an overseas organization or company.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
h. From a non-FVAP Web site.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
i. From a military post office.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
j. From my spouse	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
k. Some other source.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

32. When did you complete and return the Federal Write-In Absentee Ballot (FWAB) for the November 2, 2010 election? *If you do not recall the exact date, enter your best guess. If you think it was early in the month, enter "1", if you think it was late in the month, enter "28".*

I cannot recall well enough to even guess. ⇒ GO TO Q33

M	M	D	D
---	---	---	---

VOTING ASSISTANCE

The Department of Defense provides voting assistance from Installation Voter Assistance Offices (IVAO) and Unit Voting Assistance Officers (UVAO). IVAO/UVAOs are designated to provide accurate, non-partisan voting information and assistance to members of military units who wish to vote.

33. Were you aware that you could get information or assistance from an IVAO/UVAO?

Yes
 No ⇒ GO TO Q36

34. During 2010, did you receive voting information or assistance from an IVAO/UVAO?

Yes ⇒ GO TO Q36
 No

35. In 2010, what is the MAIN REASON you did not receive voting information or assistance from an IVAO/UVAO? *Mark one.*

- I did not need any voting information or assistance.
- I was not interested in voting.
- I did not have an IVAO/UVAO.
- I did not know how to contact my IVAO/UVAO.
- My IVAO/UVAO was not available when I needed assistance.
- My IVAO/UVAO was not helpful when I needed assistance.
- My IVAO/UVAO did not have the materials or information I needed.
- I received my voting assistance elsewhere.
- Some other reason

36. The Federal Voting Assistance Program (FVAP) Web site, www.fvap.gov, provides voting-related information and resources. Were you aware of this Web site?

Yes
 No ⇒ GO TO Q39

37. In preparation for the 2010 primaries and general election, did you visit this Web site?

Yes ⇒ GO TO Q39
 No

38. In 2010, what is the MAIN REASON you did not visit the Federal Voting Assistance Program (FVAP) Web site? *Mark one.*

- I did not need any voting information or assistance.
- I was not interested in voting.
- I did not have Internet access.
- I did not know the Web site address.
- I received my voting assistance elsewhere.
- I did not think it would be useful.
- Some other reason

39. The Department of Defense 2010-11 Voting Assistance Guide (VAG) provides state-by-state information about registering to vote and requesting an absentee ballot. Were you aware the VAG was available to you?

Yes
 No ⇒ GO TO Q42

40. In preparation for the 2010 primaries and general election, did you refer to the 2010-11 Voting Assistance Guide (VAG) for information about registering to vote or requesting an absentee ballot?

Yes ⇒ GO TO Q42
 No

41. In 2010, what is the MAIN REASON you did not use the 2010-11 Voting Assistance Guide (VAG)? Mark one.

- I did not need any voting information or assistance.
- I was not interested in voting.
- I could not get a copy.
- I received my voting assistance elsewhere.
- Some other reason

42. The Federal Voting Assistance Program (FVAP) provides a toll-free telephone service from many countries that allows a caller to ask FVAP staff for voting information or assistance. Were you aware of this service?

- Yes
- No ⇒ GO TO Q45

43. Did you use the Federal Voting Assistance Program (FVAP) toll-free telephone service to talk with a FVAP staff member in 2010?

- Yes ⇒ GO TO Q45
- No

44. In 2010, what is the MAIN REASON you did not use the Federal Voting Assistance Program's (FVAP) toll-free telephone service? Mark one.

- I did not need any voting information or assistance.
- I was not interested in voting.
- I did not know what it was for.
- I did not know the telephone number.
- I received my voting assistance elsewhere.
- I could not get through.
- A toll-free number is not available in the country where I live.
- The time difference made it difficult to reach the Federal Voting Assistance Program (FVAP) during office hours.
- Some other reason

45. In preparation for the 2010 primaries and general election, did you visit the Federal Voting Assistance Program (FVAP) on Twitter, Facebook, and/or LinkedIn? Mark one answer for each item.

	No, but I use this social networking site	No, and I do not use this social networking site	Yes
a. Twitter	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Facebook.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. LinkedIn.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

OTHER SOURCES OF VOTING INFORMATION

46. Did you receive voting information from any of the following sources in 2010? Mark one answer for each item.

	Not available	No	Yes
a. State or local election official	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Local television, radio or print media	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Armed Forces Radio/TV	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Other U.S. civilian newspapers, magazines, radio, or TV	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. International television, radio, and print media	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. My spouse.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Family members (other than spouse) or friends	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. The Internet.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Voting Assistance Officers (VAOs).....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

ELECTRONIC TRANSMISSION OF VOTING MATERIALS

47. Many of the tools available for voters require access to e-mail, the Internet, or other information technology tools. Between September 13 and November 2, 2010, did you have access to the following? Mark one answer for each item.

	Yes, but not on a regular basis	Yes, on a regular basis	No
a. Government Web sites other than FVAP (e.g., state or Federal .gov or .mil sites) ...	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Non-government Web sites (e.g., .com sites).....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Fax	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Printer.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Scanner.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. DoD e-mail address	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Personal e-mail address	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

48. During 2010, did you fax any of the following materials? Mark one answer for each item.

	Yes, but not using the FVAP toll-free faxing service	Yes, using the FVAP toll-free faxing service	No
a. Federal Post Card Application (FPCA)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Non-Federal Post Card Application request for absentee ballot	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

REASONS FOR NOT VOTING IN 2010 ELECTION

If you voted in the November 2, 2010 election, GO TO Q51.

50. What was the MAIN reason you did not vote in the November 2, 2010 election? *Mark one.*

- I was not interested in voting.
- I was not registered to vote.
- I was too busy to vote.
- I forgot to vote.
- I could not register to vote.
- I had no candidate preference.
- I did not think my vote would matter.
- The absentee voting process was too complicated.
- I was concerned about federal or state income tax liability.
- I missed the state deadline for voter registration.
- I tried to vote, but did not or could not complete the process.
- Some other reason

2008 ELECTION

51. Elections for President, the U.S. Senate, and the U.S. House of Representatives were held in 2008. A lot of respondents did not get to vote because they weren't registered, they were sick, or they just did not have time. How about you – did you vote in that election?

- Yes, I voted in person.
- Yes, I voted by mail, e-mail, fax, or online.
- No, I did not vote.
- Not sure

LOOKING FORWARD

52. If you were to need information about absentee voting in a future election, which of the following sources would best serve you? *Mark one.*

- Use an Internet search engine to find information
- Contact my state election office online
- Contact my county election office online
- Contact my Voting Assistance Officer
- Use FVAP's Web site
- Ask a friend
- Ask my spouse

53. If you were to vote using an absentee ballot in a future election, how would you prefer to receive the absentee ballot? *Mark one.*

- By postal mail
- From a Web site
- By e-mail
- By fax

54. If you were to vote using an absentee ballot in a future election, how would you prefer to return the absentee ballot? *Mark one.*

- Return by mail
- Return online
- Return via fax

55. To what extent do you agree or disagree with the following statement? I am confident that completing and sending a ballot online via the Internet is safe, secure, and reliable.

- Strongly agree
- Agree
- Neither agree nor disagree
- Disagree
- Strongly disagree

FAMILY VOTING PATTERNS

56. Your spouse's legal voting residence is the state or territory where he/she last resided prior to entering military service OR that he/she has since claimed as his/her legal residence. The right to vote extends to individuals even though they may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your spouse's legal voting residence? *Please enter the postal code for one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession. If you do not know the state or territory, please enter "DK".*

--	--

◆ 57. As of November 2, 2010, did your spouse live more than 50 miles from his/her legal voting residence?

- Yes
- No

58. As of November 2, 2010, was your spouse deployed or away from his/her permanent duty station?

- Yes, deployed
- Yes, away from his/her permanent duty station but not deployed ⇒ GO TO Q60
- No ⇒ GO TO Q60

59. Did you relocate while your spouse was deployed?

- Yes
- No

60. As of November 2, 2010, were you and your spouse living in the same residence?

- Yes
- No

For the next question, the definition of *family members* includes anyone, other than your spouse, who is of voting age (18 years old and older); related to you by blood, marriage, or adoption; depends on you/your spouse for more than half of their support; and/or is eligible to have a Uniformed Services Identification and Privilege card (also called a military ID card); or is enrolled in the Defense Enrollment Eligibility Reporting System (DEERS).

61. Not counting your spouse, do you have any family members who were at least 18 years old on November 2, 2010?

- Yes
- No ⇒ GO TO Q64

62. Did any of these family members live more than 50 miles from their legal voting residence on November 2, 2010 as a result of your spouse's active duty service?

- Yes
- No ⇒ GO TO Q64
- Don't know ⇒ GO TO Q64

63. How many of these family members lived more than 50 miles from their legal voting residence on November 2, 2010 as a result of your spouse's active duty service? *Do not include family members if you are unsure whether they lived more than 50 miles from their legal voting residence.*

- 1
- 2
- 3
- 4
- 5 or more

COMMENTS

64. If you have comments or concerns that you were not able to express in answering this survey, please enter them in the space provided. Your comments will be viewed and considered as policy deliberations take place. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. Your feedback is useful and appreciated.

Military Spouses: Web Form**

2010 Post-Election Voting Survey of Active Duty Military Spouses

BACKGROUND INFORMATION

1. What is your marital status?

- Married
- Separated
- Divorced
- Widowed
- Never married

***** Page Break *****

BACKGROUND INFORMATION

2. Was your spouse serving on active duty on November 2, 2010?

- Yes
- No

***** Page Break *****

BACKGROUND INFORMATION

3. Were you a U.S. citizen on November 2, 2010?

- Yes
- No

***** Page Break *****

BACKGROUND INFORMATION

4. Your legal voting residence is the state or territory that you claim as your legal residence even though you may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your legal voting residence? Please select from the list below one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession.

Please select

***** Page Break *****

BACKGROUND INFORMATION

5. As of November 2, 2010, did you live more than 50 miles from your legal voting residence?

- Yes
- No

***** Page Break *****

BACKGROUND INFORMATION

6. Are you Spanish/Hispanic/Latino?

- No, not Spanish/Hispanic/Latino
- Yes, Mexican, Mexican-American, Chicano, Puerto Rican, Cuban, or other Spanish/Hispanic/Latino

***** Page Break *****

BACKGROUND INFORMATION

7. What is your race? *Mark one or more races to indicate what race you consider yourself to be.*

- White
- Black or African American
- American Indian or Alaska Native
- Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian or Chamorro)

***** Page Break *****

BACKGROUND INFORMATION

8. What was your age on November 2, 2010?

- 17 years old or younger
- 18 to 24 years old
- 25 to 29 years old
- 30 to 34 years old
- 35 to 44 years old
- 45 years old or older

***** Page Break *****

BACKGROUND INFORMATION

9. On November 2, 2010, were you living in the United States/territories or overseas?

- United States/territories
- Overseas

***** Page Break *****

BACKGROUND INFORMATION

10. As of November 2, 2010, how long had you been living in this country?

- Less than 6 months
- 6 months to less than 1 year
- 1 year to less than 2 years
- 2 years to less than 3 years
- 3 years or more

***** Page Break *****

2010 ELECTION

11. Some states provide voter registration verification Web sites. Did your state of legal voting residence provide this type of Web site?

- Yes
- No
- Don't know

***** Page Break *****

2010 ELECTION

12. In 2010, were you registered to vote in the United States?

- Yes
- No

***** Page Break *****

2010 ELECTION

13. How interested or uninterested were you in the U.S. elections held on November 2, 2010?

- Very interested
- Somewhat interested
- Neither interested nor uninterested
- Somewhat uninterested
- Very uninterested

***** Page Break *****

2010 ELECTION

14. A lot of people were not able to vote because they weren't registered, they were sick, they did not have time, or something else happened to prevent them from voting. And sometimes, people who USUALLY vote or who PLANNED to vote forget that something UNUSUAL happened on election day this year that prevented them from voting THIS time. Please think about the election held on November 2, 2010 and past elections in which you may have voted. During the past 6 years, did you usually vote in national, state, and local elections, or did you usually not vote?

- Usually voted
- Usually did not vote

***** Page Break *****

2010 ELECTION

15. Do you usually vote in... Mark "Yes" or "No" for each item.

	Yes	No
a. State and local elections?	<input type="checkbox"/>	<input type="checkbox"/>
b. National elections?	<input type="checkbox"/>	<input type="checkbox"/>

***** Page Break *****

2010 ELECTION

16. During the months leading up to the election held on November 2, 2010, what were your voting plans?

- I planned to vote.
- I did not plan to vote.

***** Page Break *****

2010 ELECTION

17. In the election held on November 2, 2010, did you definitely vote in person on election day, definitely complete an absentee ballot by mail, e-mail/fax, or online on or before November 2, 2010, definitely not vote, or are you not completely sure whether you voted in that election?

- Definitely voted in person
- Definitely voted by mail, e-mail, fax, or online
- Definitely did not vote
- Not sure

***** Page Break *****

2010 ELECTION

What makes you unsure whether you voted in the November 2, 2010 election?

***** Page Break *****

ABSENTEE BALLOTS

18. Even though you did not vote, did you request an absentee ballot for the November 2, 2010 election?

- Yes
- No

***** Page Break *****

ABSENTEE BALLOTS

19. When did you first request your absentee ballot for the November 2, 2010 election? *If you do not recall the exact date, enter your best guess. If you think it was early in the month, select "1", if you think it was late in the month, select "28".*

REASONS FOR NOT VOTING IN 2010 ELECTION

Please explain your main reason for not voting in the November 2, 2010 election.

***** Page Break *****

2008 ELECTION

51. Elections for President, the U.S. Senate, and the U.S. House of Representatives were held in 2008. A lot of respondents did not get to vote because they weren't registered, they were sick, or they just did not have time. How about you – did you vote in that election?

- Yes, I voted in person.
- Yes, I voted by mail, e-mail, fax, or online.
- No, I did not vote.
- Not sure

***** Page Break *****

LOOKING FORWARD

52. If you were to need information about absentee voting in a future election, which of the following sources would best serve you? *Mark one.*

- Use an Internet search engine to find information
- Contact my state election office online
- Contact my county election office online
- Contact my Voting Assistance Officer
- Use FVAP's website
- Ask a friend
- Ask my spouse

***** Page Break *****

LOOKING FORWARD

53. If you were to vote using an absentee ballot in a future election, how would you prefer to *receive* the absentee ballot? *Mark one.*

- By postal mail
- From a Web site
- By e-mail
- By fax

***** Page Break *****

LOOKING FORWARD

54. If you were to vote using an absentee ballot in a future election, how would you prefer to *return* the absentee ballot? *Mark one.*

- Return by mail
- Return online
- Return via fax

***** Page Break *****

LOOKING FORWARD

55. To what extent do you agree or disagree with the following statement? I am confident that completing and sending a ballot online via the Internet is safe, secure, and reliable. *Mark one.*

- Strongly Agree
- Agree
- Neither agree nor disagree
- Disagree
- Strongly disagree

***** Page Break *****

FAMILY VOTING PATTERNS

56. Your spouse's legal voting residence is the state or territory where he/she last resided prior to entering military service OR that he/she has since claimed as his/her legal residence. The right to vote extends to individuals even though they may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your spouse's legal voting residence? Please select from the list below one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession. If you do not know the state or territory, please select "Don't know".

Please select

***** Page Break *****

FAMILY VOTING PATTERNS

57. As of November 2, 2010, did your spouse live more than 50 miles from his/her legal voting residence?

- Yes
- No

***** Page Break *****

FAMILY VOTING PATTERNS

58. As of November 2, 2010, was your spouse deployed or away from his/her permanent duty station?

- Yes, deployed
- Yes, away from his/her permanent duty station but not deployed
- No

***** Page Break *****

FAMILY VOTING PATTERNS

59. Did you relocate while your spouse was deployed?

- Yes
- No

***** Page Break *****

FAMILY VOTING PATTERNS

60. As of November 2, 2010, were you and your spouse living in the same residence?

- Yes
- No

***** Page Break *****

FAMILY VOTING PATTERNS

For the next question, the definition of *family members* includes anyone, other than your spouse, who is of voting age (18 years old and older); related to you by blood, marriage, or adoption; depends on you/your spouse for more than half of their support; and/or is eligible to have, a Uniformed Services Identification and Privilege card (also called a military ID card); or is enrolled in the Defense Enrollment Eligibility Reporting System (DEERS).

61. Not counting your spouse, do you have any family members, who were at least 18 years old on November 2, 2010?

- Yes
- No

***** Page Break *****

FAMILY VOTING PATTERNS

62. Did any of these family members live more than 50 miles from their legal voting residence on November 2, 2010, as a result of your spouse's active duty service?

- Yes
- No
- Don't know

***** Page Break *****

FAMILY VOTING PATTERNS

63. How many of these family members lived more than 50 miles from their legal voting residence on November 2, 2010 as a result of your spouse's active duty service? *Do not include family members if you are unsure whether they lived more than 50 miles from their legal voting residence.*

- 1
- 2
- 3
- 4
- 5 or more

***** Page Break *****

COMMENTS

64. Thank you for participating in the Post-Election Voting Survey. There are no more questions on this survey. If you would like to know when and where the results of this and other DMDC surveys are available, follow DMDC Facebook (<http://www.facebook.com/go2dmdc>) or Twitter (<http://www.twitter.com/dmdc>). If you have comments or concerns that you were not able to express in answering this survey, please enter them in the space provided. Your comments will be viewed and considered as policy deliberations take place. Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. Your feedback is useful and appreciated.

Subject: 2010 Post-Election Voting Survey of Active Duty Military Spouses
ANNOUNTEST

Dear Spouse:

Your Ticket Number: ANNOUNTEST

The Federal Voting Assistance Program (FVAP), in coordination with the Defense Manpower Data Center (DMDC), has selected you to participate in the "2010 Post-Election Voting Survey of Active Duty Military Spouses." The survey asks about your voting experiences in the last federal election and your access to voting information. We want to hear the experiences of both voters and non-voters. The survey is now available at this Web site:
<https://www.dmdc.osd.mil/dodsurvey>

Simply click on this address to go directly to the Web site, or you can "copy and paste" this address into the Web address box of your Internet browser (be sure to enter the Web address into the address box, not into a search engine, such as Google). Once you have accessed the Web site, you will need to enter the following Ticket Number to log on: ANNOUNTEST

Although the survey is voluntary, the Post-Election Voting Survey is one of the only tools we have to gauge the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) absentee voting process. We consider your responses crucial to improving the program and the absentee voting process for our uniformed service members and overseas citizens.

These surveys are "Official Business;" federal government employees can complete them at their work stations, using government equipment. If you choose, you can also complete the survey at home or elsewhere. If you log on from a non-DoD computer, you may be prompted with a security alert. If so, follow the instructions and proceed to DoD's secure survey Web site. While participation is voluntary, your opinions are very important.

If you have any questions about this survey, or would like more information on the FVAP Post-Election Voting Survey Program, contact FVAP toll-free at 1-800-438-VOTE or e-mail vote@fvap.gov

It is not necessary to complete the survey in one sitting. You can start and stop as necessary. If you cannot access the Web site or have other technical issues, please call our Survey Processing Center toll-free at 1-800-881-5307, e-mail ADMSSurvey@osd.pentagon.mil or send a fax to 1-763-268-3002. If you do not wish to participate or to receive additional reminders about this survey, you may remove yourself from our mailing list by replying to this message. Be sure to include your Ticket Number and the words, "Please remove me from this survey's mailing list" in the body of the message.

For your convenience, DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Call 426-7427 from any DoD or other government telephone with DSN for a list of current data collections by

licensed DMDC surveys. If you do not have access to a DSN telephone line, you can call 1-703-696-7427 to obtain this information. This prerecorded list does not include surveys being conducted by other DoD offices. In accordance with DoD Instruction 8910.01, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR)1918, which expires 09/30/2011.

Thank you for participating in the "2010 Post-Election Voting Survey of Active Duty Military Spouses."

Subject: 2010 Post-Election Voting Survey of Active Duty Military Spouses
PEV7MEMBER

Dear Private Jones:

The Federal Voting Assistance Program (FVAP), in cooperation with the Defense Manpower Data Center (DMDC), requests your help in carrying out FVAP's "2010 Post-Election Voting Survey of Active Duty Military Spouses". The post-election survey is conducted after every federal election to fulfill the Congressional reporting requirements of the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), and more importantly, to help FVAP assess the effectiveness of its voting assistance programs.

These laws protect the voting rights not only of members of the military, but their family members, who may find it difficult to register to vote and cast a ballot because of the demands of military service. Although the survey is completely voluntary, the information and opinions of your spouse are critically important in evaluating and improving the absentee voting process for our military personnel and overseas civilians.

In the past, we have found that military spouses have even more difficulty accessing voter assistance than military voters, and FVAP instituted a number of programs in 2010 to help military spouses to vote. We need their survey responses to see if those programs were effective.

Therefore, we ask you to encourage your spouse to complete the survey. If your spouse has not yet completed the Web survey, the Web site is:
<https://www.dmdc.osd.mil/dodsurvey>

To complete the Web survey, the following unique Ticket Number has been assigned to your spouse: PEV7MEMBER

DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Please call 426-7427 from any DoD or other government telephone with DSN for a pre-recorded list of surveys currently being conducted by DMDC. If you do not have access to a DSN telephone line, you can call 1-703-696-7427.

If you would like more information on the FVAP Post-Election Voting Survey Program, please call toll-free 1-800-438-VOTE (or from your current country by using the toll-free numbers on the FVAP Web site www.fvap.gov). You may also e-mail FVAP at vote@fvap.gov

Thank you for your help in this important study.

Subject: 2010 Post-Election Voting Survey of Active Duty Military Spouses REMIND1

Dear Spouse:

Your Ticket Number: REMIND1

If you have already taken the time to complete the "2010 Post-Election Voting Survey of Active Duty Military Spouses," thank you. If you have not had a chance to do so, please try to take the time today. While participation is voluntary, the information and the opinions you provide are very important to improving the Program. The Web site for the survey is:
<https://www.dmdc.osd.mil/dodsurvey>

Simply click on this address to go directly to the Web site, or you can "copy and paste" this address into the Web address box of your Internet browser. Once at the Web site, you will need to enter the following Ticket Number: REMIND1

If you have partially completed the survey, but have not clicked the "Submit Button," please go back, log onto the Web site, complete as many items as you can, and submit the survey to us. Only group statistics will be reported.

If you have any questions about this survey or would like more information on the FVAP Post-Election Voting Survey Program, contact FVAP toll-free at 1-800-438-VOTE or e-mail vote@fvap.gov

If you cannot access the Web site or have other technical issues, please call our Survey Processing Center toll-free at 1-800-881-5307, e-mail ADMSSurvey@osd.pentagon.mil or send a fax to 1-763-268-3002. If you do not wish to participate or to receive additional reminders about this survey, you may remove yourself from our mailing list by replying to this message. If you do not wish to participate or to receive additional reminders about this survey, you may remove yourself from our mailing list by replying to this message. Be sure to include your Ticket Number and the words, "Please remove me from this survey's mailing list" in the body of the message.

If you would like more information on the FVAP Post-Election Voting Survey Program, contact FVAP toll-free at 1-800-438-VOTE or e-mail vote@fvap.gov

For your convenience, DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Call 426-7427 from any DoD or other government telephone with DSN for a list of current data collections by licensed DMDC surveys. If you do not have access to a DSN telephone line, you can call 1-703-696-7427. This prerecorded list does not include surveys being conducted by other DoD offices. In accordance with DoD Instruction 8910.01, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR)1918, which expires 09/30/2011.

Again, thank you for completing the survey.

Subject: 2010 Post-Election Voting Survey of Active Duty Military Spouses REMIND9

Dear Mr. John Doe:

Your Ticket Number: REMIND9

If you have completed the "2010 Post-Election Voting Survey of Active Duty Military Spouses," thank you. If you have not had a chance to complete the survey, please try to take the time to take the survey before the field closes on March 15, 2011. While your participation is desired, it is entirely voluntary.

The Web site for the survey is: <https://www.dmdc.osd.mil/dodsurvey>

Simply click on this address to go directly to the Web site, or you can "copy and paste" this address into the Web address box of your Internet browser. Once at the Web site, you will need to enter the following Ticket Number: REMIND9

If you have partially completed the survey, but have not clicked the "Submit Button," please go back, log onto the Web site, complete as many items as you can, and submit the survey to us. To complete the paper version of the survey, please take time to complete the questionnaire previously mailed to you and return it in the postage-paid envelope. After March 15, we will consider whatever items you have completed to be your intended response.

If you cannot access the Web site or have other technical issues, please call our Survey Processing Center toll-free at 1-800-881-5307, e-mail ADMSSurvey@osd.pentagon.mil or send a fax to 1-763-268-3002. If you do not wish to participate in this survey, you may remove yourself from our mailing list by replying to this message. Be sure to include your Ticket Number and the words, "Please remove me from this survey's mailing list" in the body of the message.

If you would like more information on the FVAP Post-Election Voting Survey Program, contact FVAP toll-free at 1-800-438-VOTE or e-mail vote@fvap.gov

For your convenience, DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Call 426-7427 from any DoD or other government telephone with DSN for a list of current data collections by licensed DMDC surveys. If you do not have access to a DSN telephone line, you can call 1-703-696-7427. This prerecorded list does not include surveys being conducted by other DoD offices. In accordance with DoD Instruction 8910.01, all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR)1918, which expires 09/30/2011.

Thank you in advance for completing this survey.

Dear Pat Sample:

The Federal Voting Assistance Program (FVAP), in cooperation with the Defense Manpower Data Center (DMDC), has selected you to participate in FVAP's *2010 Post-Election Voting Survey of Military Spouses*. This survey is conducted after every federal election to fulfill the reporting requirements of the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), as amended by the 2009 Military and Overseas Voter Empowerment Act (MOVE). These surveys help FVAP improve the absentee voting process for military personnel and overseas citizens by identifying problems they may have experienced and developing ways to address those problems in future elections. The survey asks about your voting experiences in the last federal election and your access to voting information. **We want to hear the experiences of voters and non-voters.**

Please update your contact information, such as your name, preferred postal address and e-mail address to receive an e-mail notification of the survey's availability. To update your contact information, go to <https://www.dmdc.osd.mil/dodsurvey> and enter your **Ticket Number: FXXXXXXX**

The survey will be available at the same Web site around December 20, 2010. This site can be accessed from any computer with Internet access. The survey is *Official Business*; federal government employees may complete the survey at your duty station using government equipment. Be sure to enter the address into the address box of your internet browser, not a search engine (e.g., Google). If you log on from a non-DoD computer, you may be prompted with a security alert. If so, follow the instructions and proceed to DoD's secure survey Web site.

If you have any questions regarding how to complete this survey or troubleshooting issues, you may contact us by calling our Survey Processing Center at 1-800-881-5307, e-mailing us at ADMSSurvey@osd.pentagon.mil, or by sending a fax to 1-763-268-3002. Be sure to include your Ticket Number in all communications.

DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Please call 426-7427 from any DoD or other government telephone with DSN for a prerecorded list of surveys currently being conducted by DMDC. If you do not have access to a DSN telephone line, you can call 1-703-696-7427 to obtain this information.

If you have any questions or suggestions about this survey, please call toll-free 1-800-438-VOTE (or from your current country by using the toll-free numbers on the FVAP Web site www.fvap.gov). You may also e-mail FVAP at vote@fvap.gov.

Thank you for your participation in this important study.

Sincerely,

Bob Carey
Director, FVAP

Dear Pat Sample:

The Federal Voting Assistance Program (FVAP), in cooperation with the Defense Manpower Data Center (DMDC), recently requested your participation in FVAP's *2010 Post-Election Voting Survey of Military Spouses*. The post-election survey is conducted after every federal election to fulfill the reporting requirements of the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UCAVA), as amended by the 2009 Military and Overseas Voter Empowerment Act (MOVE). Although the survey is completely voluntary, the information and opinions you provide are critically important in evaluating and improving the absentee voting process for our military personnel and overseas civilians.

If you have already completed the survey, I want to thank you for taking the time to do so. If you have not yet completed the Web survey, you may still do so—Go to the following Web site: <https://www.dmdc.osd.mil/dodsurvey> and enter your **Ticket Number: FXXXXXXX**

If you do not wish to participate in this survey or to receive reminders about this survey, you may remove yourself from the mailing list by contacting the Survey Processing Center. Be sure to include your Ticket Number in all communications.

DMDC has set up a telephone line for anyone who wishes to verify the survey's legitimacy. Please call 426-7427 from any DoD or other government telephone with DSN for a prerecorded list of surveys currently being conducted by DMDC. If you do not have access to a DSN telephone line, you can call 1-703-696-7427.

If you would like more information on the FVAP Post-Election Voting Survey Program, please call toll-free 1-800-438-VOTE (or from your current country by using the toll-free numbers on the FVAP Web site www.fvap.gov). You may also e-mail FVAP at vote@fvap.gov.

Thank you for your participation in this important study.

Sincerely,

Bob Carey
Director, FVAP

Dear Pat Sample:

Several months ago, the Federal Voting Assistance Program (FVAP), in cooperation with the Defense Manpower Data Center (DMDC), requested your participation in FVAP's *2010 Post-Election Voting Survey of Military Spouses*. However, as of this writing, your completed questionnaire has not been received at the Survey Processing Center and our deadline is fast approaching. Because your views and opinions are important, I urge you to take this final opportunity to complete the survey. Although the survey is completely voluntary, the information and opinions you provide are critically important in evaluating and improving the absentee voting process for our military personnel and overseas civilians.

If you have already completed the survey, thank you for your time and cooperation. If you have not already done so, please take time to complete the questionnaire previously mailed to you and return it in the postage-paid envelope or complete the survey via the Web. To access the Web version of the survey, go to <https://www.dmdc.osd.mil/dodsurvey> and enter the following
Ticket Number: FXXXXXXX

If you have partially completed the survey, but have not clicked the "Submit" button, please go back, log onto the Web site, complete as many items as you can and submit the survey to us. After March 15, 2011, we will consider whatever items you have completed to be your intended response.

If you have questions regarding how to complete this survey or troubleshooting issues, you may contact us by calling our Survey Processing Center at 1-800-881-5307, e-mailing us at ADMSSurvey@osd.pentagon.mil, or by sending a fax to 1-763-268-3002. Please be sure to include your Ticket Number in all communications.

- Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian or Chamorro)

***** Page Break *****

BACKGROUND INFORMATION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No")
SRAGEGP

8. What was your age on November 2, 2010?

- 1 17 years old or younger
- 2 18 to 24 years old
- 3 25 to 29 years old
- 4 30 to 34 years old
- 5 35 to 44 years old
- 6 45 years old or older

***** Page Break *****

BACKGROUND INFORMATION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
STATION

9. On November 2, 2010, were you living in the United States/territories or overseas?

- 1 United States/territories
2 Overseas

***** Page Break *****

BACKGROUND INFORMATION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger") AND ([STATION] = "Overseas")
HOWLONG

10. As of November 2, 2010, how long had you been living in this country?

- 1 Less than 6 months
2 6 months to less than 1 year
3 1 year to less than 2 years
4 2 years to less than 3 years
5 3 years or more

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
REGWEB

11. Some states provide voter registration verification Web sites. Did your state of legal voting residence provide this type of Web site?

- 1 Yes
2 No
3 Don't know

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
REGVOTER

12. In 2010, were you registered to vote in the United States?

- 2 Yes
1 No

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
INTEREST

13. How interested or uninterested were you in the U.S. elections held on November 2, 2010?

- 1 Very interested
2 Somewhat interested
3 Neither interested nor uninterested
4 Somewhat uninterested
5 Very uninterested

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
VOTEPAST

14. A lot of people were not able to vote because they weren't registered, they were sick, they did not have time, or something else happened to prevent them from voting. And sometimes, people who USUALLY vote or who PLANNED to vote forget that something UNUSUAL happened on election day this year that prevented them from voting THIS time. Please think about the election held on November 2, 2010 and past elections in which you may have voted. During the past 6 years, did you usually vote in national, state, and local elections, or did you usually not vote?

- 2 Usually voted
1 Usually did not vote

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger") AND ([VOTEPAST] = "Usually voted")

USUVOTEA, USUVOTEB

15. Do you usually vote in... Mark "Yes" or "No" for each item.

	Yes	No
a. State and local elections?	<u>2</u> <input type="checkbox"/>	<u>1</u> <input type="checkbox"/>
b. National elections?	<input type="checkbox"/>	<input type="checkbox"/>

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
VOTEPLAN

16. During the months leading up to the election held on November 2, 2010, what were your voting plans?

- 1 I planned to vote.
2 I did not plan to vote.

***** Page Break *****

2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
VOTED

17. In the election held on November 2, 2010, did you definitely vote in person on election day, definitely complete an absentee ballot by mail, e-mail/fax, or online on or before November 2, 2010, definitely not vote, or are you not completely sure whether you voted in that election?

- 1 Definitely voted in person
2 Definitely voted by mail, e-mail, fax, or online
3 Definitely did not vote
4 Not sure

REASONS FOR NOT VOTING IN 2010 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger") AND ([VOTED] = "Definitely did not vote")

NOVOTE

50. What was the MAIN reason you did not vote in the November 2, 2010 election. *Mark one.*

- 1 I was not interested in voting.
- 2 I was not registered to vote.
- 3 I was too busy to vote.
- 4 I forgot to vote.
- 5 I could not register to vote.
- 6 I had no candidate preference.
- 7 I did not think my vote would matter.
- 8 The absentee voting process was too complicated.
- 9 I was concerned about federal or state income tax liability.
- 10 I missed the state deadline for voter registration.
- 11 I tried to vote but did not or could not complete the process.
- 12 Some other reason

2008 ELECTION

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
VOTELAST

51. Elections for President, the U.S. Senate, and the U.S. House of Representatives were held in 2008. A lot of respondents did not get to vote because they weren't registered, they were sick, or they just did not have time. How about you – did you vote in that election?

- 1 Yes, I voted in person.
- 2 Yes, I voted by mail, e-mail, fax, or online.
- 3 No, I did not vote.
- 4 Not sure

***** Page Break *****

LOOKING FORWARD

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
BESTSRC

52. If you were to need information about absentee voting in a future election, which of the following sources would best serve you? *Mark one.*

- 1 Use an Internet search engine to find information
- 2 Contact my state election office online
- 3 Contact my county election office online
- 4 Contact my Voting Assistance Officer
- 5 Use FVAP's website
- 6 Ask a friend
- 7 Ask my spouse

***** Page Break *****

LOOKING FORWARD

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
RECBAL

53. If you were to vote using an absentee ballot in a future election, how would you prefer to receive the absentee ballot? Mark one.

- 1 By postal mail
- 2 From a Web site
- 3 By e-mail
- 4 By fax

***** Page Break *****

LOOKING FORWARD

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
RETBAL

54. If you were to vote using an absentee ballot in a future election, how would you prefer to return the absentee ballot? Mark one.

- 1 Return by mail
- 2 Return online
- 3 Return via fax

***** Page Break *****

LOOKING FORWARD

NOT ([SRMARST] = "Divorced" OR [SRMARST] = "Widowed" OR [SRMARST] = "Never married") AND NOT ([CURRACTIVE] = "No") AND NOT ([USCTZN] = "No") AND NOT ([SRAGEGP] = "17 years old or younger")
SAFEBAL

55. To what extent do you agree or disagree with the following statement? I am confident that completing and sending a ballot online via the Internet is safe, secure, and reliable. Mark one.

- 5 Strongly Agree
- 4 Agree
- 3 Neither agree nor disagree
- 2 Disagree
- 1 Strongly disagree

SPLEGALRES

Your spouse's legal voting residence is the state or territory where he/she last resided prior to entering military service OR that he/she has since claimed as his/her legal residence. The right to vote extends to individuals even though they may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your spouse's legal voting residence? Please select from the list below one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession. If you do not know the state or territory, please select "Don't know".

Appendix E.

Coding Scheme

APPENDIX E: Coding Scheme for the 2010 Post-Election Voting Survey of Active Duty Military Spouses

The guiding premise of this DMDC survey is that the analysts creating the dataset will not be the only ones analyzing the data. DMDC rarely collects data only for immediate use or to answer one question. Different people, both at DMDC and other organizations, analyze DMDC datasets over time. Every care is taken in organizing and documenting DMDC surveys so secondary analysts can be reasonably certain they understand both how data were coded and the limitations of the data. This appendix describes (1) conventions for naming variables, (2) methods for capturing data from the survey instrument, and (3) the process of editing survey response variables created for the analysis file.

Variable Naming

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic may need to be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in organizational commitment items included in a survey of active duty members in 1999 and in an exit survey in 2000. Conventions discussed below are being used as a means for facilitating such analyses

Non-survey-derived Variables

Variable names for non-survey-derived variables tend to be character strings that aid in remembering the meanings of the variables. Two important conventions were used in naming variables.

Administrative record variables. A variable name from DMDC record files is used only if the data, values, and value labels are identical to those from an official DMDC data file. When data is added to an analysis file unchanged from record data, the same variable name, values, and value labels are used. For example, if SVC is a field in the record data indicating the employee's direct employing agency, since the variable in the survey data file is identical to that in the record data from the month that the sample is drawn, the same variable name and labels are used. In contrast, the variable SRSVC will have slightly different values and value labels, and consequently is given a variable name that is not used in the official records so as not to confuse analysts who work routinely with record data.

Crossing variables. Beginning a variable name with "X" indicates it is a special crossing (marginal) variable for key analyses. "X variables" typically involve using record data to impute values for missing data in survey items. "X variables" may also require collapsing or recoding to missing in order to preserve the confidentiality of respondents. (See Appendix J for the programming that was used to compute "X variables.")

Survey Variables

Standard survey response and operational variables. Variables common to DMDC surveys are assigned identical names and values across surveys. The prefix "SR" is used for self-

reported demographic survey items: SRMARST and SRAGEGP are examples. Examples of common operational variables are CMTFLAG (indicates whether the respondent entered a comment) and DARVDATE (date the survey was submitted)

Nonstandard survey response variables. Survey item variables are named according to the following conventions (illustrated for the 2010 Post-Election Voting Survey of Active Duty Military Spouses):

- 1) Naming conventions of all Federal Voting Assistance Program (FVAP) post-election surveys variables tend to be character strings that aid in remembering the item text and have been standardized across surveys. The length of these variables names are limited to twelve characters.
- 2) The last position may represent sub-items for multi-part survey items, or “U” (indicating that the values have not been edited to enforce skip pattern consistency) or “R” (indicating that the original values have been recoded).
- 3) The exceptions, skip pattern flags (“SK”) and specify flags (“SP”), are explained later in the section Standard Flag Variables. Specify flags (ending in a “SP”) represent whether information has been written in a specify box. Certain types of negative replies such as, nothing, none, NA, and not applicable are ignored. The information contained in the write-in variables is not on the survey file, but housed separately in a verbatim file. Skip flag variables (ending in a “SK”) are created, and codes are assigned to indicate if respondents completed the skip patterns correctly.

Raw-Data Encoding Process

When a respondent completes an online survey, data are stored in an indexed file on the Web (data) server. This file is copied to the operations contractor’s internal network and the data are matched to the sample file, attaching each member’s survey responses to the sample record. Paper surveys are scanned using Intelligent Character Recognition (ICR) technology. If any documents cannot be scanned, they are batched separately and the data are key-entered. The data from the paper form are then merged with the Web data.

As a result of this merge, survey items appearing on the paper form but not on the Web form have missing values on Web respondents’ records; these missing values are assigned the SAS special value .F. For example, question 17 specify appeared only on the Web *2010 Post – Election Voting Survey of Active Duty Military Spouses* form. Therefore, these items (variable VOTEDSP) were assigned the value .F on paper respondents’ records. More information on missing values is given in the section “Missing Data Codes.”

The data are then cleaned in an iterative multi-step process. First, values are assigned to valid responses (see Appendix D for the annotated form) and item nonresponse is coded (-9). Then the process creates flag variables for respondent-specified items; flags, validates, and codes skip pattern variables; codes the content of text entries.

The Web survey form’s “other specify” and open-ended comments are collected in a comment file and linked to the Web survey data by ticket number. The paper survey form “other

specify” and open-ended comments are collected in a comment file and linked to the data by an identifier given to each survey as it is scanned. All text entries are cleaned and edited to remove identifying information and expletives. The long comment item at the end of the questionnaire is keyed in a separate process. The comments data are confidential and are not merged into the returns dataset.

The next sections discuss the assignment of missing value codes, the special treatment of data variables, and the editing of variable to enforce skip patterns.

Value Coding and Formats

Datasets are prepared as SAS¹ system files. An OS or flat file version of the basic survey release file is then prepared from the SAS system file. This section describes how values are treated in creating the SAS system files and notes any differences in the flat file.

In the SAS system files, variables are declared as numeric unless they contain true alphabetic characters. Although numeric variables can take more storage space, many statistical and logical operations can be done only with variables that are declared as numeric. Values for alphabetic variables are input with \$CHARww. formats to preserve leading, embedded, and trailing blanks.

Missing Data Codes

The instructions used to assign missing data codes and other special codes are shown in Tables E-1 and E-2. The labels associated with each assigned value are shown in italicized text. These are the SAS format labels used in the SAS dataset.

- Table E-1 contains basic SAS and flat file missing data values.
- Table E-2 contains SAS and flat file missing data values for dates.

The values presented in Table E-1 are general missing data values that have been adopted in recent years for use on DMDC surveys. (Standards for date variables are in Table E-2.) Both tables have separate columns for values used for SAS system files and flat files. The biggest difference between the flat files and SAS system files is in the treatment of missing values. The flat file values differ from the SAS values because SAS implements special missing values and formats that may not be compatible with other statistical analysis software such as SPSS².

¹ SAS is a trademark of the SAS Institute, Inc.

² SPSS is a trademark of SPSS Inc.

Table E-1.
Basic SAS[®] and Flat Missing Data Values

SAS [®] File		Flat File		Description
Numeric	Alpha	Numeric	Alpha	
.	.	-9	.	<i>No response or missing skip</i>
.S	.S	-8	.S	<i>Survey self-report ineligible</i>
.O	.O	-7	.O	<i>Out-of-range</i>
.N	.N	-6	.N	<i>Not applicable or Valid skip</i>
.F	.F	-5	.F	<i>Variable not on survey form.</i> This value is reserved for multiple-form surveys
.I	.I	-4	.I	<i>Incomplete grid or multiple response error</i>
.B	.B	-1	.B	<i>No survey returned.</i> Filler values for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.

Table E-2.
SAS[®] and Flat File Missing Data Values for Dates

SAS [®] File		Flat File		Description
Re-coded value	Value read from input	YYYYMMDD	MMYYYY	
.	-54908	18090901	SEP1809	<i>No response (invalid skip)</i>
.O	-55701	18070701	JUL1807	<i>Out-of-range error</i>
.N	-56096	18060601	JUN1806	<i>Not applicable (valid skip)</i>
.I	-56887	18040401	APR1804	<i>Incomplete grid error</i>
.B	-58073	18010101	JAN1801	<i>No survey returned.</i> Filler values for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.

Note: This conversion has already been done in DMDC SAS[®] files.

SAS can represent up to 27 missing data values for numeric variables as either a period or a period-letter combination. While SAS can read alpha characters representing missing data in a raw data field declared to be numeric, other programs such as SPSS do not accept these characters in numeric fields. Missing numeric data are represented in the flat files by negative numbers that can be declared as missing values. For example, a survey self-report ineligible in flat files is coded as a “-8”, which can be declared as a missing value when the data are input in SPSS—in the SAS file, the value “.S” is used to represent a survey self-report ineligible.

Data requirements of SUDAAN³ are also considered in coding. Primarily this means avoiding in coding the use of a zero, which has a special use for certain procedures in SUDAAN, for a variable that will be used as a categorical independent variable.

Many types of missing data are common to scanned surveys and are self explanatory. In general, missing data are coded as “-9” (SAS: .) for item nonresponse; survey self-report ineligibles are coded as “-8” (SAS: .S).⁴ Incomplete responses in grids that could not be resolved by visual inspection are coded as “-4” (SAS:.I). Out-of-Range responses in grids (e.g., number of days or weeks in a year larger than 365 or 52, respectively) are coded as “-7” (SAS: .O). For a single item that contains a response alternative of “Not applicable”, a missing data code of “-6” (SAS: .N) is typically used. When multiple items can be affected by a skip pattern or when item(s) have multiple ways to be not applicable, other specific codes are used. This type of coding is discussed later in the section entitled “Skip Pattern Coding.”

Multiple survey forms or modes (e.g., paper and web) are sometimes used in a single effort, and the data from all the related forms combined into a single dataset for analysis. Questions may appear in one form or mode but not in another. In a combined dataset, a code of “-5” (SAS: .F) indicates missing data for variables not on the form completed by a respondent.

Records are included in the files for sampled spouses regardless of whether or not they returned a survey. If a spouse did not return a survey or returned a blank survey, every survey variable is assigned a value of “-1” (SAS: .B).

Standard Flag Variables

Skip pattern flags indicate whether one or more questions were or are not to be asked of respondents. For example, if respondents to this survey indicated on question 29 (AWAREFWAB) that they were not aware that they could use FWAB for the November 2, 2010 election, then web respondents did not see question 30; did they use the FWAB in November 2, 2010 election? AWAREFWABSK is a flag variable indicating whether question 30 (FWABUSE) was answered consistently with the skip pattern. The skip flag is then used to remove incongruent responses from the paper form. Skip flags are useful for evaluating the effectiveness of the skip pattern and for screening out ambiguous response patterns during analysis.

³ SUDAAN is a trademark of the Research Triangle Institute.

⁴ Multiple response errors can only occur for users of the paper form. Web instrument, through the use of radio buttons, does not allow multiple responses for one item.

Skip flags are set during data editing in accordance with Table E-2. Skip flags are set in the manner discussed in Table E-3; however, the specifics for each skip flag are detailed in the next section. Note that the value -9 (SAS: .) is used to represent missing data in flag variables in a slightly different way than they are used for standard survey variables.

Special Codes for Skip Patterns

Discrepancies in skip patterns are resolved during data editing. First, skip flags are created. The section Raw-Data Encoding Process introduced the general outline of the skip flags, but the specific flags for each skip pattern are specified in Table E-3.⁵ After the creation of all the skip flags, variables within the skip patterns are forward coded to make them consistent with the variables that start the skip patterns. To preserve all data, the variables within skip patterns are first copied to a set of confidential variables. The convention for naming these “raw” variables is to end the name with “U” for Unedited. Table E-3 specifies how to assign the special values to variables within the skip patterns. While Table E-3 is organized to show all the edits for a skip pattern, all skip flags are set prior to undertaking any forward coding. The remainder of this section describes the logic behind coding of skip patterns.

While an analyst can ignore discrepancies between a respondent’s answer on an item containing a conditional direction to skip items and answers to those items, it is generally better to resolve the discrepancies. Two ways of resolving the discrepancies can be termed backward and forward coding. Backward coding involves correcting the discrepancy by editing back from the skip pattern items to make the initial question conform. Forward coding involves correcting the discrepancy by editing forward from the initial question to make the skip pattern items conform. Data for this survey are forward coded with data on the starting question accepted as marked and data for the items within the skip pattern edited to be consistent with the starting question.

If a starting item is marked in such a way that the respondent should skip, items within the skip pattern have the not applicable value (.N) assigned regardless of what the respondent marked on the items within the skip pattern. These values differentiate items with data missing because the item should have been skipped from items where data are missing because the respondent should have answered them but did not.

Table E-3:
Special Coding Notes

Note Coding instructions and codebook specifications

- 1. HOWLONGSK, HOWLONGU. The following explains how to create the flag variable -- the codebook page should contain this information:**

⁵ Table E-3 also provides special coding notes for other non-obvious codings.

HOWLONGSK is an indicator of whether **HOWLONG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (STATION = 2) then **HOWLONGSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

HOWLONGU = **HOWLONG**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If **HOWLONGSK** = 1 then do;

HOWLONG = .N;

end;

.N = (Not Applicable)

2. **USUVOTESK, USUVOTEAU, USUVOTEBU. The following explains how to create the flag variable -- the codebook page should contain this information:**

USUVOTESK is an indicator of whether **USUVOTEAU, USUVOTEBU** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTEPAST = 2) then **USUVOTESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

USUVOTEAU = **USUVOTEAU, USUVOTEBU** = **USUVOTEBU**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If **USUVOTESK** = 1 then do;

USUVOTEAU = .N;

USUVOTEBU = .N;

end;

.N = (Not Applicable)

3. **VOTEDSPSK, VOTEDSPU. The following explains how to create the flag variable - the codebook page should contain this information:**

VOTEDSPSK is an indicator of whether **VOTEDSP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 4) then **VOTEDSPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

VOTEDSPU = **VOTEDSP**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If VOTEDSPSK = 1 then do;

VOTEDSP = '.N';

end;

.N = (Not Applicable)

4. **REQABSBALSK, REQABSBALU. The following explains how to create the flag variable -- the codebook page should contain this information:**

REQABSBALSK is an indicator of whether **REQABSBAL** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 3) then **REQABSBALSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

REQABSBALU = **REQABSBAL**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If REQABSBALSK = 1 then do;

REQABSBAL = .N;

end;

.N = (Not Applicable)

5. **REQABSMOSK, REQABSMO1U, REQABSMO2U, REQABSMO3U, REQFPCA**. The following explains how to create the flag variable -- the codebook page should contain this information:

REQABSMOSK is an indicator of whether **REQABSMO1, REQABSMO2, REQABSMO3, REQFPCA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2) OR (REQABSBAL = 2)) then **REQABSMOSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

REQABSMO1U = REQABSMO1, REQABSMO2U = REQABSMO2, REQABSMO3U = REQABSMO3, REQFPCA = **REQFPCA**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If **REQABSMOSK** = 1 then do;

REQABSMO1 = .N;

REQABSMO2 = .N;

REQABSMO3 = .N;

REQFPCA = .N;

end;

.N = (Not Applicable)

6. **WHEREFPCASK, CONFPCAAU, CONFPCABU, CONFPCACU, WHEREFPCAAU, WHEREFPCABU, WHEREFPCACU, WHEREFPCADU, WHEREFPCAEU, WHEREFPCAFU**. The following explains how to create the flag variable -- the codebook page should contain this information:

WHEREFPCASK is an indicator of whether **CONFPCAA, CONFPCAB, CONFPCAC, WHEREFPCAA, WHEREFPCAB, WHEREFPCAC, WHEREFPCAD, WHEREFPCAE, WHEREFPCAF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2 OR REQABSBAL = 2) AND REQFPCA = 2) then **WHEREFPCASK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

CONFPCAAU = CONFPCAA, CONFPCABU = CONFPCAB, CONFPCACU = CONFPCAC, WHEREFPCAAU = WHEREFPCAA, WHEREFPCABU = WHEREFPCAB, WHEREFPCACU = WHEREFPCAC, WHEREFPCADU = WHEREFPCAD, WHEREFPCAEU = WHEREFPCAE, WHEREFPCAFU = WHEREFPCAF, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If WHEREFPCASK = 1 then do;

```
CONFPCAA = .N;  
CONFPCAB = .N;  
CONFPCAC = .N;  
WHEREFPCAA = .N;  
WHEREFPCAB = .N;  
WHEREFPCAC = .N;  
WHEREFPCAD = .N;  
WHEREFPCAE = .N;  
WHEREFPCAF = .N;
```

end;

.N = (Not Applicable)

7. **RECABSSK, RECABSU. The following explains how to create the flag variable -- the codebook page should contain this information:**

RECABSSK is an indicator of whether **RECABS** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2) OR (REQABSBAL = 2)) then **RECABSSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

RECABSU = RECABS, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If RECABSSK = 1 then do;

```
RECABS = .N;
```

end;

.N = (Not Applicable)

8. **OBTABSSK, OBTABSAU, OBTABSB, OBTABSCU, OBTABSDU, OBTABSEU, OBTABSFU, OBTABSGU, OBTABSHU, RECABSWH1U, RECABSWH2U, RECABSWH3U, RETABSU. The following explains how to create the flag variable -- the codebook page should contain this information:**

OBTABSSK is an indicator of whether **OBTABSA, OBTABSB, OBTABSC, OBTABSD, OBTABSE, OBTABSF, OBTABSG, OBTABSH, RECABSWH1, RECABSWH2, RECABSWH3, RETABS** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2 OR REQABSBAL = 2) AND RECABS = 2) then **OBTABSSK = 2** (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

OBTABSAU = OBTABSA, OBTABSB, OBTABSCU = OBTABSC, OBTABSDU = OBTABSD, OBTABSEU = OBTABSE, OBTABSFU = OBTABSF, OBTABSGU = OBTABSG, OBTABSHU = OBTABSH, RECABSWH1U = RECABSWH1, RECABSWH2U = RECABSWH2, RECABSWH3U = RECABSWH3, RETABSU = RETABS, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If OBTABSSK = 1 then do;

OBTABSA = .N;
OBTABSB = .N;
OBTABSC = .N;
OBTABSD = .N;
OBTABSE = .N;
OBTABSF = .N;
OBTABSG = .N;
OBTABSH = .N;
RECABSWH1 = .N;
RECABSWH2 = .N;
RECABSWH3 = .N;
RETAGS = .N;

end;

.N = (Not Applicable)

9. **RETABSWHISK, RETABSWH1U, RETABSWH2U, RETABSWH3U.** The following explains how to create the flag variable -- the codebook page should contain this information:

RETABSWHISK is an indicator of whether **RETABSWH1, RETABSWH2, RETABSWH3** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2 OR REQABSBAL = 2) AND RECABS = 2 AND RETABS = 2) then **RETABSWHISK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

RETABSWH1U = RETABSWH1, RETABSWH2U = RETABSWH2, RETABSWH3U = RETABSWH3, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If RETABSWHISK = 1 then do;

RETABSWH1 = .N;

RETABSWH2 = .N;

RETABSWH3 = .N;

end;

.N = (Not Applicable)

10. **PROCVOTESK, AWAREFWABU, PROCVOTEAU, PROCVOTEBU, PROCVOTECU, PROCVOTEDU, PROCVOTEEU, PROCVOTEFU.** The following explains how to create the flag variable -- the codebook page should contain this information:

PROCVOTESK is an indicator of whether **AWAREFWAB, PROCVOTEAU, PROCVOTEBU, PROCVOTECU, PROCVOTEDU, PROCVOTEEU, PROCVOTEFU** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2) OR (REQABSBAL = 2)) then **PROCVOTESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

AWAREFWABU = AWAREFWAB, PROCVOTEAU = PROCVOTEAU, PROCVOTEBU = PROCVOTEBU, PROCVOTECU = PROCVOTECU,

PROCVOTEDU = PROCVOTED, PROCVOTEEU = PROCVOTEE, PROCVOTEFU = PROCVOTEF, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If PROCVOTESK = 1 then do;

```
AWAREFWAB = .N;  
PROCVOTEA = .N;  
PROCVOTEB = .N;  
PROCVOTEC = .N;  
PROCVOTED = .N;  
PROCVOTEE = .N;  
PROCVOTEF = .N;
```

end;

.N = (Not Applicable)

11. FWABUSESK, FWABUSEU. The following explains how to create the flag variable -- the codebook page should contain this information:

FWABUSESK is an indicator of whether **FWABUSE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((VOTED = 2 OR REQABSBAL = 2) AND AWAREFWAB = 2) then **FWABUSESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

FWABUSEU = FWABUSE, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If FWABUSESK = 1 then do;

```
FWABUSE = .N;
```

end;

.N = (Not Applicable)

12. **WHEREFWABSK, FWABWHEN1U, FWABWHEN2U, FWABWHEN3U, WHEREFWABAU, WHEREFWABBU, WHEREFWABCU, WHEREFWABDU, WHEREFWABEU, WHEREFWABFU, WHEREFWABGU, WHEREFWABHU, WHEREFWABIU, WHEREFWABJU, WHEREFWABKU.** The following explains how to create the flag variable -- the codebook page should contain this information:

WHEREFWABSK is an indicator of whether **FWABWHEN1, FWABWHEN2, FWABWHEN3, WHEREFWABA, WHEREFWABB, WHEREFWABC, WHEREFWABD, WHEREFWABE, WHEREFWABF, WHEREFWABG, WHEREFWABH, WHEREFWABI, WHEREFWABJ, WHEREFWABK** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((**VOTED = 2 OR REQABSBAL = 2**) AND **FWABUSE = 2** and **AWAREFWAB = 2**) then **WHEREFWABSK = 2** (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

FWABWHEN1U = FWABWHEN1, FWABWHEN2U = FWABWHEN2, FWABWHEN3U = FWABWHEN3, WHEREFWABAU = WHEREFWABA, WHEREFWABBU = WHEREFWABB, WHEREFWABCU = WHEREFWABC, WHEREFWABDU = WHEREFWABD, WHEREFWABEU = WHEREFWABE, WHEREFWABFU = WHEREFWABF, WHEREFWABGU = WHEREFWABG, WHEREFWABHU = WHEREFWABH, WHEREFWABIU = WHEREFWABI, WHEREFWABJU = WHEREFWABJ, WHEREFWABKU = WHEREFWABK, but are unedited for forward coding of non-applicable or missing response values. Here is how they are edited:

If **WHEREFWABSK = 1** then do;

FWABWHEN1 = .N;
FWABWHEN2 = .N;
FWABWHEN3 = .N;
WHEREFWABA = .N;
WHEREFWABB = .N;
WHEREFWABC = .N;
WHEREFWABD = .N;
WHEREFWABE = .N;
WHEREFWABF = .N;
WHEREFWABG = .N;
WHEREFWABH = .N;
WHEREFWABI = .N;
WHEREFWABJ = .N;
WHEREFWABK = .N;

end;

.N = (Not Applicable)

13. VAORECSK, VAORECU. The following explains how to create the flag variable -- the codebook page should contain this information:

VAORECSK is an indicator of whether **VAOREC** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAOHELP = 2) and (VOTED = 2 or VOTED = 3) then **VAORECSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

VAORECU = **VAOREC**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If VAORECSK = 1 then do;

VAOREC = .N;

end;

.N = (Not Applicable)

14. NOVAOASK, NOVAOAU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOVAOASK is an indicator of whether **NOVAOA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAOHELP = 2 AND VAOREC = 1) and (VOTED = 2 or VOTED = 3) then **NOVAOASK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOVAOAU = **NOVAOA**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOVAOASK = 1 then do;

NOVAOA = .N;

end;

.N = (Not Applicable)

15. NOVAOASPSK, NOVAOASPU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOVAOASPSK is an indicator of whether **NOVAOASP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAOHELP = 2 AND VAOREC = 1 AND NOVAOA = 9) and (VOTED = 2 or VOTED = 3) then **NOVAOASPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOVAOASPU = **NOVAOASP**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOVAOASPSK = 1 then do;

NOVAOASP = '.N';

end;

.N = (Not Applicable)

16. VISITWEBSK, VISITWEBU. The following explains how to create the flag variable -- the codebook page should contain this information:

VISITWEBSK is an indicator of whether **VISITWEB** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (WEBSITE = 2) and (VOTED = 2 or VOTED = 3) then **VISITWEBSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

VISITWEBU = **VISITWEB**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If VISITWEBSK = 1 then do;

VISITWEB = .N;

end;

.N = (Not Applicable)

17. NOFWEBASK, NOFWEBAU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOFWEBASK is an indicator of whether **NOFWEBA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (WEBSITE = 2 AND VISITWEB = 1) and (VOTED = 2 or VOTED = 3) then **NOFWEBASK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOFWEBAU = **NOFWEBA**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOFWEBASK = 1 then do;

NOFWEBA = .N;

end;

.N = (Not Applicable)

18. NOFWEBASPSK, NOFWEBASPU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOFWEBASPSK is an indicator of whether **NOFWEBASP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (WEBSITE = 2 AND VISITWEB = 1 AND NOFWEBA = 7) and (VOTED = 2 or VOTED = 3) then **NOFWEBASPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOFWEBASPU = **NOFWEBASP**, but are unedited for forward coding of non-

applicable or missing response values.
Here is how they are edited:

If NOFWEBASPSK = 1 then do;

NOFWEBASP = '.N';

end;

.N = (Not Applicable)

19. REFERVAGSK, REFERVAGU. The following explains how to create the flag variable -- the codebook page should contain this information:

REFERVAGSK is an indicator of whether **REFERVAG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAG = 2) and (VOTED = 2 or VOTED = 3) then **REFERVAGSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

REFERVAGU = **REFERVAG**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If REFERVAGSK = 1 then do;

REFERVAG = .N;

end;

.N = (Not Applicable)

20. REASVAGSK, REASVAGU. The following explains how to create the flag variable -- the codebook page should contain this information:

REASVAGSK is an indicator of whether **REASVAG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAG = 2 AND REFERVAG = 1) and (VOTED = 2 or VOTED = 3) then **REASVAGSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

REASVAGU = REASVAG, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If REASVAGSK = 1 then do;

REASVAG = .N;

end;

.N = (Not Applicable)

21. REASVAGSPSK, REASVAGSPU. The following explains how to create the flag variable -- the codebook page should contain this information:

REASVAGSPSK is an indicator of whether **REASVAGSP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VAG = 2 AND REFERVAG = 1 AND REASVAG = 5) and (VOTED = 2 or VOTED = 3) then **REASVAGSPSK = 2** (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

REASVAGSPU = REASVAGSP, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If REASVAGSPSK = 1 then do;

REASVAGSP = '.N';

end;

.N = (Not Applicable)

22. USEFVAPTFSK, USEFVAPTFU. The following explains how to create the flag variable -- the codebook page should contain this information:

USEFVAPTFSK is an indicator of whether **USEFVAPTF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (FVAPTF = 2) and (VOTED = 2 or VOTED = 3) then **USEFVAPTFSK = 2** (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

USEFVAPTFU = USEFVAPTF, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If USEFVAPTFSK = 1 then do;

USEFVAPTF = .N;

end;

.N = (Not Applicable)

23. NOFVAPTFSK, NOFVAPTFU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOFVAPTFSK is an indicator of whether **NOFVAPTF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (FVAPTF = 2 AND USEFVAPTF = 1) and (VOTED = 2 or VOTED = 3) then **NOFVAPTFSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOFVAPTFU = NOFVAPTF, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOFVAPTFSK = 1 then do;

NOFVAPTF = .N;

end;

.N = (Not Applicable)

24. NOFVAPTFSPSK, NOFVAPTFSPU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOFVAPTFSPSK is an indicator of whether **NOFVAPTFSP** were or were not to be

asked of a respondent and its initial value is 1 (Not asked). If (FVAPTF = 2 AND USEFVAPTF = 1 AND NOFVAPTF = 9) and (VOTED = 2 or VOTED = 3) then **NOFVAPTFSPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOFVAPTFSPU = **NOFVAPTFSP**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOFVAPTFSPSK = 1 then do;

NOFVAPTFSP = '.N';

end;

.N = (Not Applicable)

25. NOVOTESK, NOVOTEU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOVOTESK is an indicator of whether **NOVOTE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 3) then **NOVOTESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOVOTEU = **NOVOTE**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOVOTESK = 1 then do;

NOVOTE = .N;

end;

.N = (Not Applicable)

26. NOVOTESPSK, NOVOTESPU. The following explains how to create the flag variable -- the codebook page should contain this information:

NOVOTESPSK is an indicator of whether **NOVOTESP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 3 AND NOVOTE = 12) then **NOVOTESPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NOVOTESPU = **NOVOTESP**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NOVOTESPSK = 1 then do;

NOVOTESP = '.N';

end;

.N = (Not Applicable)

27. RELOCATESK, RELOCATEU. The following explains how to create the flag variable -- the codebook page should contain this information:

RELOCATESK is an indicator of whether **RELOCATE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (SPDEPLOY = 3) then **RELOCATESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

RELOCATEU = **RELOCATE**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If RELOCATESK = 1 then do;

RELOCATE = .N;

end;

.N = (Not Applicable)

28. DEPRESIDESK, DEPRESIDEU. The following explains how to create the flag variable -- the codebook page should contain this information:

DEPRESIDESK is an indicator of whether **DEPRESIDE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (ANYDEP = 2) then **DEPRESIDESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

DEPRESIDEU = **DEPRESIDE**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If DEPRESIDESK = 1 then do;

DEPRESIDE = .N;

end;

.N = (Not Applicable)

29. NUMUOCAVASK, NUMUOCAVAU. The following explains how to create the flag variable -- the codebook page should contain this information:

NUMUOCAVASK is an indicator of whether **NUMUOCAVA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (ANYDEP = 2 AND DEPRESIDE = 1) then **NUMUOCAVASK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

NUMUOCAVAU = **NUMUOCAVA**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If NUMUOCAVASK = 1 then do;

NUMUOCAVA = .N;

end;

.N = (Not Applicable)

30. VAOHELPSK, VAOHELPU. The following explains how to create the flag variable -- the codebook page should contain this information:

VAOHELPSK is an indicator of whether **VAOHELP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 2 or VOTED = 3) then **VAOHELPSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

VAOHELPU = **VAOHELP**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If VAOHELPSK = 1 then do;

 VAOHELP = .N;

end;

.N = (Not Applicable)

31. WEBSITESK, WEBSITEU. The following explains how to create the flag variable -- the codebook page should contain this information:

WEBSITESK is an indicator of whether **WEBSITE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 2 or VOTED = 3) then **WEBSITESK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

WEBSITEU = **WEBSITEG**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If WEBSITESK = 1 then do;

WEBSITE = .N;

end;

.N = (Not Applicable)

32. VAGSK, VAGU. The following explains how to create the flag variable -- the codebook page should contain this information:

VAGSK is an indicator of whether **VAG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 2 or VOTED = 3) then **VAGSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

VAGU = **VAG**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If VAGSK = 1 then do;

VAG = .N;

end;

.N = (Not Applicable)

33. FVAPTFSK, FVAPTFU. The following explains how to create the flag variable -- the codebook page should contain this information:

FVAPTFSK is an indicator of whether **FVAPTF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 2 or VOTED = 3) then **FVAPTFSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

FVAPTFU = **FVAPTFG**, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If FVAPTFSK = 1 then do;

FVAPTF = .N;

end;

.N = (Not Applicable)

34. **SOCIALSK, SOCIALAU, SOCIALBU, SOCIALCU, RECINFOAU, RECINFOBU, RECINFOCU, RECINFODU, RECINFOEU, RECINFOFU, RECINFOGU, RECINFOHU, RECINFOIU, AVAILTOOLAU, AVAILTOOLBU, AVAILTOOLCU, AVAILTOOLDU, AVAILTOOLEU, AVAILTOOLFU, AVAILTOOLGU, FAXAU, FAXBU, FAXCU, FAXDU, FAXEU, EMAILAU, EMAILBU, EMAILCU, EMAILDU, EMAILEU.** The following explains how to create the flag variable -- the codebook page should contain this information:

SOCIALSK is an indicator of whether **SOCIALA, SOCIALB, SOCIALC, RECINFOA, RECINFOB, RECINFOC, RECINFOD, RECINFOE, RECINFOF, RECINFOG, RECINFOH, RECINFOI, AVAILTOOLA, AVAILTOOLB, AVAILTOOLC, AVAILTOOLD, AVAILTOOLE, AVAILTOOLF, AVAILTOOLG, FAXA, FAXB, FAXC, FAXD, FAXE, EMAILA, EMAILB, EMAILC, EMAILD, EMAILE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (VOTED = 2 or VOTED = 3) then **SOCIALSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

SOCIALAU = SOCIALA, SOCIALBU = SOCIALB, SOCIALCU = SOCIALC, RECINFOAU = RECINFOA, RECINFOBU = RECINFOB, RECINFOCU = RECINFOC, RECINFODU = RECINFOD, RECINFOEU = RECINFOE, RECINFOFU = RECINFOF, RECINFOGU = RECINFOG, RECINFOHU = RECINFOH, RECINFOIU = RECINFOI, AVAILTOOLAU = AVAILTOOLA, AVAILTOOLBU = AVAILTOOLB, AVAILTOOLCU = AVAILTOOLC, AVAILTOOLDU = AVAILTOOLD, AVAILTOOLEU = AVAILTOOLE, AVAILTOOLFU = AVAILTOOLF, AVAILTOOLGU = AVAILTOOLG, FAXAU = FAXA, FAXBU = FAXB, FAXCU = FAXC, FAXDU = FAXD, FAXEU = FAXE, EMAILAU = EMAILA, EMAILBU = EMAILB, EMAILCU = EMAILC, EMAILDU = EMAILD, EMAILEU = EMAILE, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If **SOCIALSK** = 1 then do;

SOCIALA = .N;
SOCIALB = .N;
SOCIALC = .N;
RECINFOA = .N;
RECINFOB = .N;
RECINFOC = .N;
RECINFOD = .N;
RECINFOE = .N;
RECINFOF = .N;
RECINFOG = .N;
RECINFOH = .N;
RECINFOI = .N;
AVAILTOOLA = .N;
AVAILTOOLB = .N;
AVAILTOOLC = .N;
AVAILTOOLD = .N;
AVAILTOOLE = .N;
AVAILTOOLF = .N;
AVAILTOOLG = .N;
FAXA = .N;
FAXB = .N;
FAXC = .N;
FAXD = .N;
FAXE = .N;
EMAILA = .N;
EMAILB = .N;
EMAILC = .N;
EMAILD = .N;
EMAILE = .N;

end;

.N = (Not Applicable)

35. COMMINELIGSK, COMMINELIGU. The following explains how to create the flag variable -- the codebook page should contain this information:

COMMINELIGSK is an indicator of whether **COMMINELIG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (SRMARST = 3 OR SRMARST = 4 OR SRMARST = 5 OR CURRACTIVE = 1 OR SRAGEGP = 1) then **COMMINELIGSK** = 2 (Asked).

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

COMMNELIGU = COMMNELIG, but are unedited for forward coding of non-applicable or missing response values.

Here is how they are edited:

If COMMNELIGSK = 1 then do;

COMMNELIG = '.N';

end;

.N = (Not Applicable)

36. **SRRACEA—SRRACEE, SRRETH1**

The codebook pages for SRRACEA—SRRACEE should note:

“These items are consistent with the ‘1997 Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity’ and the 2000 Decennial Census.”

SRRACEA-SRRACEE are coded as “Mark all that apply” items, where 1= Not marked and 2= Marked. SRRACEA indicates whether the “White” response category was marked, SRRACEB indicates whether the “Black or African-American” response category was marked, SRRACEC indicates whether “American Indian or Alaska Native” was marked, SRRACED indicates whether “Asian” was marked, and SRRACEE indicates whether “Native Hawaiian or other Pacific Islander” was marked. If none are marked then all of SRRACEA-SRRACEE are assigned -9 (missing).

SRRACE1 groups the responses to SRRACEA-SRRACEE into Racial categories including multi-Racial combinations. The coding for SRRACE1 follows the coding provided in the chart below.

Appendix F.

REPORT DOCUMENTATION PAGE

*Form Approved
OMB No. 0704-0188*

The public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0188), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS.

1. REPORT DATE (DD-MM-YYYY)		2. REPORT TYPE		3. DATES COVERED (From - To)	
4. TITLE AND SUBTITLE				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES)				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT					
13. SUPPLEMENTARY NOTES

a. REPORT	b. ABSTRACT	c. THIS PAGE			19b. TELEPHONE NUMBER (Include area code)

INSTRUCTIONS FOR COMPLETING SF 298

1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

4. TITLE. Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

5a. CONTRACT NUMBER. Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

5b. GRANT NUMBER. Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

5c. PROGRAM ELEMENT NUMBER. Enter all program element numbers as they appear in the report, e.g. 61101A.

5d. PROJECT NUMBER. Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

5e. TASK NUMBER. Enter all task numbers as they appear in the report, e.g. 05; RFO330201; T4112.

5f. WORK UNIT NUMBER. Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.

10. SPONSOR/MONITOR'S ACRONYM(S). Enter, if available, e.g. BRL, ARDEC, NADC.

11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

13. SUPPLEMENTARY NOTES. Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

14. ABSTRACT. A brief (approximately 200 words) factual summary of the most significant information.

15. SUBJECT TERMS. Key words or phrases identifying major concepts in the report.

16. SECURITY CLASSIFICATION. Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.

Information Gathered on the Survey

REQFPCA

The Federal Post Card Application (FPCA; Standard Form 76) is a request for registration and a regular (as opposed to back-up) absentee ballot. Some states require eligible voters who vote absentee to use the Federal Post Card Application (FPCA) to request an absentee ballot. Did you use the FPCA to request your absentee ballot for the November 2, 2010 election?

SPLEGALRESR2

Tab Recode: Your spouse's legal voting residence is the state or territory where he/she last resided prior to entering military service OR that he/she has since claimed as his/her legal residence. The right to vote extends to individuals even though they may no longer own property or have other ties there. As of the November 2, 2010 election, what state or territory was your spouse's legal voting residence? Please select from the list below one of the 50 states, D.C., Puerto Rico, or a U.S. territory or possession. If you do not know the state or territory, please select "Don't know".

VOTEPAST

A lot of people were not able to vote because they weren't registered, they were sick, they did not have time, or something else happened to prevent them from voting. And sometimes, people who USUALLY vote or who PLANNED to vote forget that something UNUSUAL happened on election day this year that prevented them from voting THIS time. Please think about the election held on November 2, 2010 and past elections in which you may have voted. During the past 6 years, did you usually vote in national, state, and local elections, or did you usually not vote?

REQFPCAU

Uned- The Federal Post Card Application (FPCA; Standard Form 76) is a request for registration and a regular (as opposed to back-up) absentee ballot. Some states require eligible voters who vote absentee to use the Federal Post Card Application (FPCA) to request an absentee ballot. Did you use the FPCA to request your absentee ballot for the November 2, 2010 election?

PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

Categories show range of average months away for persons in occupation groups. This variable is constructed from the match of duty occupations from 1006 Active Duty Master Edit file to Months Away (Proxy Perstempo) data. Months Away is based upon Family Separation Allowance disbursement tempo (and Hazardous Duty Pay) for service members with dependents.
