Acknowledgments

Defense Manpower Data Center (DMDC) is indebted to numerous people for their assistance with the *2010 Post-Election Voting Survey of Active Duty Military Spouses (2010 PEV7)*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSDP&R). The survey program is conducted under the leadership of Timothy Elig, Director of the *Human Resources Strategic Assessment Program (HRSAP)*.

Policy officials contributing to the development of this survey include Bob Carey and Paul Drugan (Federal Voting Assistance Program).

DMDC's Program Evaluation Branch, under the guidance of Kristin Williams, Branch Chief, is responsible for the development of questionnaires used in the SOFS program. The lead survey design analysts were Rachel Lipari and Elizabeth Van Winkle. In addition, they designed the unique presentation of complex items used in this tabulation volume.

DMDC's Personnel Survey Branch, under the guidance of David McGrath, Branch Chief, is responsible for sampling and weighting methods used in the SOFS program. Laverne Wright, Chief of Survey Operations, is responsible for survey database construction and archiving. The lead operations analyst on this survey was Dee Batra, SRA International, Inc. She used DMDC's Statistical Analysis Macro to calculate the estimates presented in this tabulation volume. The lead sampling analysts on this survey were Eric Falk, DMDC, and Fawzi Al Nassir, SRA International, Inc. They used the DMDC Sampling Tool to plan the sample and develop weights for this survey. Susan Reinhold and Carole Massey provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Survey Technology Branch, under the guidance of Frederick Licari, Branch Chief, is responsible for the distribution of datasets outside of DMDC and maintaining records on compliance with the Privacy Act and 32 CFR 219.

Jacqueline Malone, SRA International, Inc., formatted and assembled this tabulation volume using DMDC's Survey Reporting Tool. A team consisting of Elizabeth Van Winkle and Suzette Tassin, Consortium Research Fellow, completed quality control for this tabulation volume.

2010 POST-ELECTION VOTING SURVEY OF ACTIVE DUTY MILITARY SPOUSES: TABULATIONS OF RESPONSES

Introduction to the Survey

The *Human Resources Strategic Assessment Program* (HRSAP), Defense Manpower Data Center (DMDC), conducts both Web-based and paper-and-pencil surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. While the primary sources of information for HRSAP are *Status of Forces Surveys* (SOFS), DMDC developed the *Post-Election Voting Surveys* in 2008. *Post-Election Voting Surveys* are conducted at the request of the Federal Voting Assistance Program (FVAP) office as required by the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), 42 USC 1973ff, as amended in November 2009 by the Military and Overseas Voter Empowerment Act (MOVE), for an evaluation of the effectiveness of assistance provided to UOCAVA voters for the 2010 federal office elections.

This report contains tabulations of responses from the *Post-Election Voting Survey of Active Duty Military Spouses (2010 PEV7)*, conducted from December 20, 2010 through March 31, 2011. Active duty military members are covered by the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA). The UOCAVA population consists of the active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard. The 2010 PEV7 targeted spouses of UOCAVA covered active duty members. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The 2010 PEV7 was subdivided into the following ten areas: background information, the 2010 election, absentee ballots, voting assistance information, other sources of voting information, electronic transmission of voting materials, reasons for not voting in the 2010 election, the 2008 election, looking forward, and family voting patterns. Topics covered within the ten areas of the 2010 PEV7 are described below:

1. *Background Information*—Marital status, member's active duty status, citizenship, state residency, geographic location on election day, time overseas, race/ethnicity, and age.

¹ Details on survey methodology are reported by DMDC (2011b).

² Refer to DMDC (2011a) to view a screen-shot version of the survey as it appeared on the Web.

2. *2010 Election*—Availability of voter registration verification Web sites, voter registration status, voting interest, voting history, and voting behavior in the 2010 election.
3. *Absentee Ballots*—Absentee ballot requests; use of Federal Post Card Applications (FPCA); sources used to obtain FPCA; notification regarding submitted FPCA; receipt, completion, and return of absentee ballots; satisfaction with process of registering to vote and absentee voting process; use of the Federal Write-In Absentee Ballot (FWAB); sources used to obtain FWAB; and completion of the FWAB.
4. *Voting Assistance Information*—Use of and reasons for not using Installation/Unit Voting Assistance Officers; use of and reasons for not using the Federal Voting Assistance Program (FVAP) Web site; use of and reasons for not using the *DoD 2010-11 Voting Assistance Guide*; use of and reasons for not using the FVAP toll-free telephone service; and use of the FVAP information on Twitter, Facebook, and LinkedIn.
5. *Other Sources of Voting Information*—Use of other sources of voting information (e.g., state or local election officials, news media, spouse).
6. *Electronic Transmissions of Voting Materials*—Access to fax/e-mail and use of fax or e-mail to request absentee ballots and/or cast ballots.
7. *Reasons for Not Voting in the 2010 Election*—Main reason for not voting (e.g., too busy to vote, no candidate preference, could not register to vote).
8. *2008 Election*—Voting behavior in the 2008 election.
9. *Looking Forward*—Best sources of information for future absentee voting; preference for receipt and return of absentee ballot for future elections; and confidence in the safety, security, and reliability of completing and sending absentee ballot via the Internet.
10. *Family Voting Patterns*—Geographic location of spouse and family members on Election Day.

Population and Reporting Categories

The target population for the *2010 PEV7* consisted of spouses of active duty members of the Army, Navy, Marine Corps, Air Force, and Coast Guard who have at least six months of service at the time the questionnaire is first fielded and who are below flag rank. Spouses of National Guard/Reserve members were excluded from the target population. In addition, for respondents to have remained eligible, they must have indicated that, at the time of the survey, they were a U.S. citizen and were currently married to an active duty member.

Survey results are presented for the total population and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents were classified by survey self-report. If the self-reported data are missing, then DMDC's *Active Duty Master Edit File* data, at the time of sampling, is used to impute a subgroup classification. Survey results are tabulated by member Service and paygrade; and spouse age, location, race/ethnicity, gender, absentee voter status, and voter registration status. Definitions for reporting categories follow:

- *Member Service*—The categories include *Army, Navy, Marine Corps, Air Force, and Coast Guard*.
- *Member Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1-E9). The *Enlisted* subgroup is broken into the *E1 – E5* and *E6 – E9* categories. The *Officers* subgroup is subdivided into *W1 – W5, O1 – O3, and O4 – O6*.
- *Spouse Age*—Categories include *18 to 24 Years Old, 25 to 29 Years Old, 30 to 34 Years Old, 35 to 44 Years Old, and 45 Years Old or More*.
- *Spouse Location*—The primary classification distinguishes *Overseas* from *US (Incl. Territories)*. *US (Incl. Territories)* include spouses located in the 50 states, the District of Columbia, Puerto Rico, and United States territories or possessions. Spouse location is also presented by age subcategories.
- *Spouse Race/Ethnicity*—Respondents are classified based on self-reported categories consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino.
- *Spouse Gender*—This category is self-explanatory.
- *Proximity to Voting Residence*—Respondents are classified based on self-reported legal voting residence as defined in the UOCAVA). *Absent* includes spouses who indicated they lived more than 50 miles from their legal voting residence on November 2, 2010. *Not Absent* includes spouses who indicated they lived within 50 miles of their legal voting residence on November 2, 2010.
- *Voter Registration Status*—Respondents are classified based on self-reported registration status. *Registered to Vote* includes spouses who indicated they were registered to vote in the United States in 2010.

Survey Methodology

The Web survey administration process began on December 20, 2010, with the mailout of notification letters to sample members. This notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected from December 20, 2010 to March 31, 2011.

Single-stage, nonproportional stratified random sampling³ procedures were used. The sample consisted of 50,132 individuals drawn from the sample frame constructed from DMDC's *Active Duty Master Edit File*. Respondents became ineligible if they indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that their spouses were not on active duty as of the first day of the Web survey, December 20, 2010 (2,831, or 6% of the sample).

Completed surveys were defined as those in which (1) 50% or more of the survey questions were answered by participants who were identified as registered voters and (2) any questionnaire from participants that answered as non-registered voters. Completed surveys were received from 6,491 eligible respondents. The overall weighted response rate for eligible sample members, corrected for nonproportional sampling and nonlocation, was 14%.

Data were weighted using the industry standard three-stage process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The three-stage process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
- *Adjustments for nonresponse*—Some sampled members do not respond to the survey. Continuing the previous example, suppose only half of sample

³ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, spouses might be grouped by member paygrade and Service (e.g., all Army enlisted spouses in one group). Spouses are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

members, 500, completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the nonresponse rate. In this example, the base weight (10) is multiplied by the reciprocal of the nonresponse rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.

- *Adjustment to known population values*—The first of the two previous weighting adjustments are applied according to the demographic groupings used in designing the subgroups for the sample. The second is based on population characteristics that are known to be related to whether a sample person responds to the survey. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to increase the precision of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 women and 1,500 men, but the nonresponse-adjusted weighted estimates from the respondents was 7,000 women and 3,000 men. To dampen this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for women and 0.5 for men so that the final weights for women and men would be 24.3 and 10 which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (page 6) shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the estimated number of members and the portion of total members in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.

Tabulation Procedures

Tabulations⁴ for each question from the survey are shown on one page. To compress the width of columns in the tables, the response options are shown with a number or letter; then that number or letter is used as the column heading for the responses. The central feature of the tabulations is the percentage of members choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding error.

Where an item lends itself to presentation as an average, that average is also shown as both a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. In some cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. If this percentage is not 100, it may reflect item nonresponse, and the table note indicates that “Percent responding are active duty spouses who answered the question.” In most cases, however, not all questions will apply to every respondent. Where possible, the Web survey is programmed to skip respondents over questions that do not apply to them. For example, Q19 (When did you first request your absentee ballot for the November 2, 2010 election?) does not apply to those who marked in Q18 that they did not request an absentee ballot. The table note for this question indicates, “Percent responding are active duty spouses who answered the question and who definitely voted by mail, e-mail/fax, or online in the November 2, 2010 election (Q17) or who definitely did not vote but requested an absentee ballot for the election (Q18).”

Combining Information From Multiple Items

Tabulations in this volume generally present data for individual survey questions. There is one exception. In Q7, spouses are asked to mark one or more races. The tabulations show the percentage who responded that they were *White*, *Black*, *American Indian/Alaska Native*, *Asian*, and/or *Native Hawaiian/Other Pacific Islander*. Respondents who indicated more than one race are also shown in the percentage of *More than one race*. For example, if a respondent indicated they were *Asian* and *White*, they were counted in the percentage as *Asian*, *White*, and *More than one race*.

⁴ Details of data editing and preparation are provided by DMDC (2010a).

Margins of Error

The complex sample design required weighting to produce population estimates (e.g., percent male).⁵ Because of the weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN[®] PROC DESCRIPT (Research Triangle Institute, 2004).

By definition, sample surveys are subject to sampling error. Standard errors are estimates of the variance around population parameters, such as percentages or means, and are used to construct margins of error (i.e., confidence interval half-widths). Percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (*Max ME*) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,
- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 30), or relative standard error (greater than 0.225),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- no Max ME is printed when all percentages in the row are shown as NR,
- no margin of error is printed for an average when it is shown as NR.

⁵ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN[®] PROC DESCRIPT, correctly calculate standard errors, variances, or tests of statistical significance for stratified samples.

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

In accordance with the Privacy Act, this notice informs you of the purpose of the survey and how the findings of these surveys will be used. It also provides information about the Privacy Act and about informed consent. Please read it carefully.

AUTHORITY: The authority to solicit the information requested in this survey is contained in the Uniformed and Overseas Citizens Absentee Voting Act of 1986, Section 101.b (1), 42 USC §1973ff (UOCAVA) and the Military and Overseas Voter Empowerment Act (MOVE Act), a subtitle of the National Defense Authorization Act for Fiscal Year 2010.

PRINCIPAL PURPOSE: Information collected in this survey will be used to evaluate the effectiveness of assistance under UOCAVA, as amended in November 2009 by the MOVE Act, in the 2010 election. Reports will be provided to Federal Voting Assistance Program (FVAP). Previous survey results have affected decisions in critical areas such as establishing advertising campaigns geared towards 18-21 year old uniformed service members, utilizing social networking sites to encourage voter participation, and developing online Federal Post Card Application and Federal Write-In Absentee Ballot wizards. Survey results are also the basis for the Legislative Initiative scoring index that annually measures FVAP's success in convincing States to adopt their recommendations. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. Data could be used in future research. Datasets without any identifying information may be analyzed by researchers outside of DMDC. Briefings and reports on results from these surveys will be posted on the Web: <http://www.dmdc.osd.mil/surveys/>

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. Most people can complete the survey in 20 minutes. There is no penalty or loss of benefits to which you are entitled if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by government and contractor staff engaged in, and for purposes of, the survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the U.S. Army Medical Research and Materiel Command are eligible to review research records as a part of their responsibility to protect human subjects in research. This survey is being conducted for research purposes. In no case will individual identifiable survey responses be reported. If you answer any items and indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC will notify an office in your area for appropriate action.

SURVEY ELIGIBILITY AND POTENTIAL BENEFITS: DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, gender). This is your chance to be heard on issues that directly affect you, including sources of voting information and assistance, satisfaction with voting information and assistance, and voting in the 2010 election. While there is no direct benefit for your individual participation, your responses on this survey **make a difference**.

STATEMENT OF RISK: The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure that survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses. Survey data may be shared with organizations doing research on DoD personnel but only after minimizing detailed demographic data (for example, paygrade and detailed location information) that could possibly be used to identify an individual. A confidentiality analysis is performed to reduce the risk of there being a combination of demographic variables that can single out an individual. Government and contractor staff members have been trained to protect client identity and are subject to civil penalties for violating your confidentiality.

If you experience any difficulties taking the survey, please contact the Survey Processing Center by sending an e-mail to ADMSSurvey@osd.pentagon.mil or call, toll-free, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact: Ms. Caroline Miner, Human Research Protection Program Manager for the Office of the Under Secretary of Defense (P&R), HRPP@tma.osd.mil (703) 575-2677.

Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to March 15, 2011. Please include in the e-mail or phone message your name, Ticket Number, and the PIN that you selected when you started this survey. Unless withdrawn, partially completed survey data may be used after that date.

Click *Continue* if you agree to do the survey.

FREQUENTLY ASKED QUESTIONS

What is Defense Manpower Data Center (DMDC)?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in Department of Defense (DoD). DMDC also conducts Joint-Service surveys including the Status of Forces Surveys, QuickCompass, and Human Relations Surveys for the Department of Defense. To learn more, visit the DMDC Web site.

<http://www.dmdc.osd.mil/>

What are the Post-Election Voting (PEV) Surveys?

- Post-Election Voting (PEV) surveys are sponsored by the Director of the Federal Voting Assistance Program (FVAP) as the Presidential designee to administer the Overseas Citizens Absentee Voting Act (UOCAVA). UOCAVA, as amended in 2010, requires FVAP to report to Congress how effective programs are for assisting overseas citizens to vote in Federal elections. The PEV surveys are designed to assist FVAP in administering UOCAVA and are used to develop ways to make absentee voting easier for military personnel and overseas citizens.

What is the UOCAVA?

- The Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) was enacted in 1986. UOCAVA law permits members of the Uniformed Services and Merchant Marines, their eligible family members, and U.S. citizens residing overseas, to vote in general elections. The Federal Voting Assistance Program (FVAP) has been charged with administering UOCAVA law and works on behalf of all UOCAVA citizens to ensure their right to vote, no matter where in the world they may be residing.

How do I know this is an official, approved DoD survey?

- In accordance with [DoD Instruction 8910.01](#), all data collection in the Department must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# DD-P&R(AR)1918, expiring 09/30/2011.

How did you pick me?

- DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., location, gender).

Why should I participate?

- This is your chance to be heard on issues that directly affect you, including sources of voting information and assistance, satisfaction with voting information and assistance, and voting in the 2010 election.
- Your responses on this survey **make a difference**.

How do I participate?

- The survey will be available at this Web site around December 20, 2010. At the present time, you may (1) verify contact information, and (2) provide a postal and e-mail address so we can notify you when the survey opens.

What is ADMSSurvey@osd.pentagon.mil?

- The official e-mail address for communicating with Active duty military spouses about Post-Election Voting PEV surveys. "ADMSSurvey" is short for Active Duty Military Spouses.

Why am I being asked to use the Web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool starts on a .mil site within DMDC. Once you enter your ticket number you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to take the survey in one sitting?

- No, it is not necessary to complete the survey in one sitting. From any survey item, just click the *Save and Return Later* button. All of your responses are saved. When you return to the Web site, enter your Ticket Number and PIN. You will re-start the survey at the point you stopped.

Why does the survey ask personal questions?

- DMDC reports overall results, as well as by other characteristics, such as location, gender, etc. To complete these analyses, we must ask respondents for these types of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.
- Sometimes sensitive questions are asked in order to improve personnel policies, programs, and practices. As with all questions on the surveys, your responses will be held in confidence.

Will my answers be kept private?

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579).
- All data will be reported in the aggregate and no individual data will be reported.

Can I withdraw my answers once I have started the survey?

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to March 15, 2011 by sending an e-mail to ADMSSurvey@osd.pentagon.mil or calling, toll-free 1-800-881-5307. Include your name, Ticket Number and PIN.

Will I ever see the results of the survey?

- DMDC posts survey results on the following Web site:
<http://www.dmdc.osd.mil/surveys/>
